...W Accepts Report Urging ...n on DDT Within 2 Years

...INGTON, Nov. 12 ...ealth, Education and ... Secretary Robert H. ... accepted and sent to ... House a report urg... "major use" of DDT ... in the United States ...o-year period.

...House Press Secretary ...er said Mr. Finch had ...ade a specific recom... on the finding of the ...harmful effects of the

...hn G. Veneman, HEW ...retary, said Mr. Finch ...ssed the proposal with ...inet colleagues, Agri... Secretary Clifford M. ... and Interior Secretary ... Hickel, and both were ... to the idea." Mr. ... said he favored banning

...Ziegler said the report ...r. Finch had been re... Dr. Lee A. DuBridge, ... Nixon's science advis... that it would be discuss... ...her by the Environ... Quality Council which ...ridge heads.

...h Agriculture Depart... source also said the de... expects to announce ...ban on most—but not ...s of the pesticide.

AP.

Robert H. Finch

Mr. Veneman said Mr. Finch had not signed an order for an outright ban since the authority to curb the use of DDT on crops is in Mr. Hardin's hands.

"What he did was accept a report which concludes that major use of DDT be phased out over a period of two years," Mr. Veneman told newsmen on *Capitol Hill*.

The Agriculture Department source commented that "we have been looking at DDT uses on a use-by-use basis. We do anticipate some action relatively soon on a use-by-use basis." The source added he could not speculate at this time as to which or how many uses would be affected.

Sen. Gaylord Nelson, D., Wis., said he hoped the report "will be the first dramatic step in removing all slow-degrading pesticides from the market."

DDT has been under attack because it remains virulent, finding its way into plants and animals months and even years after it has performed its initial function.

Less than ten days ago 17 congressmen asked Mr. Nixon to ban the use of DDT except in emergency situations. In addition, the Agriculture Department has recommended that private and commercial users of DDT try to find a substitute with shorter-lasting effects.

Sen. Nelson said DDT "has been proven a major source of environmental deterioration on a worldwide basis."

The pesticide is most frequently used in the control of boll weevils in cotton crops and in anti-mosquito programs. About $30 million worth of DDT was manufactured in the United States last year.

Tank Leak Found in Apollo-12

Officials Hopeful On Quick Repair

CAPE KENNEDY, Nov. 12 (UPI).—Project officials ordered a faulty hydrogen tank replaced in the Apollo-12 moonship today and were still aiming toward a Friday launching.

Apollo-12 astronauts Charles Conrad jr., Richard Gordon and Alan Bean are targeted for an 11:22 a.m. (1622 GMT) blastoff and a space agency spokesman said "we're going to try to make it."

If the Friday start of the moon landing mission cannot be met, another try can be made on Sunday.

The trouble interrupted an almost flawless series of pre-launch preparations. It was discovered late in the morning.

The problem involved one of the 28-gallon liquid hydrogen tanks in Apollo-12's service module, the unit that services the Apollo command module. Liquid hydrogen must be kept at 423 degrees below zero and each of the tanks has a vacuum jacket to insulate it.

Trouble Detected

The trouble was detected when technicians began flowing the hydrogen into the tank. The hydrogen, used to fuel the spacecraft's fuel-cell power generators, was drained from the tank early in the afternoon after the vacuum leak was discovered.

Sources said a new hydrogen tank would be flown to the launch site from Beech Aircraft Corp., Boulder, Colo., as soon as possible. The 31-inch-diameter tank is made of titanium.

A space agency spokesman could not confirm that a new tank would be shipped to the cape, but he said the faulty tank could be replaced at the launch pad. However, he said, "It's never been done on the pad so we don't know exactly how long it would take."

If Apollo-12 cannot be readied for launch Friday, the next—and final—launch opportunity this month would come Sunday.

Because of a complex relationship between the Apollo-12 landing site, the earth and the sun, after Sunday the next launch opportunity would not come until Dec. 14.

The sources said the nature of the problem probably means that a time-consuming repair process would be necessary. This, he said, would mean the tank could not be fixed in time for a launch Sunday.

The space agency said an investigation was under way "to determine the extent of the difficulty and its effect on launch operations."

The weather and all other aspects of pre-launch preparations were reported satisfactory.

Before the difficulty cropped up, the three astronauts worked out in spacecraft trainers, brushing up on critical portions of their ten-day spaceflight.

Landing Point

Should the launch be postponed until Sunday, the landing point on the moon would be shifted 260 miles to the west of the target for a Friday launch.

Earlier today, the space agency said the target site for the lunar landing craft had been changed by some 1,000 feet.

The new touchdown target for a Friday blast-off is beside the Surveyor-3 spacecraft which soft-landed in a crater in April, 1967, and sent back thousands of pictures.

The agency said the reason for the change was to improve the crew's ability to study the planned landing point during the last stages of the descent.

The astronauts will examine the Surveyor and bring pieces back to earth for scientific study to see how they have fared during exposure to the lunar environment.

GETS SUPPORT—Ousted from her ruling Congress party by a working committee, Prime Minister Indira Gandhi immediately got support from other party members who called for a meeting today to reconsider.

Old Guard Votes Mrs. Gandhi Out Of Ruling Party

By Sydney H. Schanberg

NEW DELHI, Nov. 12 (NYT).—The old-guard faction of India's ruling Congress party expelled Prime Minister Indira Gandhi from the party today for "grave acts of indiscipline" and directed its bloc in Parliament to elect a new leader.

But Mrs. Gandhi brushed aside the move as "illegal and of no validity." She said she was still a member of the party and would continue as prime minister. She has held the post since January, 1966.

Her faction, meanwhile, renewed an appeal to party members to attend a party convention she has scheduled for the end of next week, in opposition to the old guard's convention set for next month.

This was the most bizarre day yet in the four-month struggle between her left-of-center faction and the old guard, which is known as The Syndicate. In scenes comic but for their serious implications for the stability of the government, each side held meetings, news conferences and demonstrations at which each declared itself the official leadership of the party and dismissed the other as a renegade band bent on the party's destruction.

At one point tonight, The Syndicate was announcing that a meeting of the party's parliamentary bloc that Mrs. Gandhi has scheduled for tomorrow had been canceled because she was no longer the leader, while her side was announcing that the meeting was definitely on.

The prime minister's meeting is expected to be held as scheduled tomorrow, but The Syndicate bloc plans to boycott it. The Syndicate said it would hold another meeting, some time before the winter session opens on Monday, to pick its own parliamentary leader.

Thus by Monday there should be two official Congress party groups in Parliament. Mrs. Gandhi is expected to retain a comfortable majority in the party itself, but without The Syndicate bloc—which is estimated at between 50 and 100—she will need substantial support from Communists, leftists and independents to produce a majority on the floor and therefore remain in power.

There are 282 Congress party members in the lower house, which has a total of 523 members.

Her Faction Confident

Her camp is confident she has this support, but some political observers think it could erode. In any event, The Syndicate is not able at this point to bring her down with a no-confidence motion, which requires a two-thirds vote in the party's bloc.

She has already said she has no intention of moving to dissolve Parliament and seek a clear majority through new elections, which would be one alternative to depending on leftist votes.

She has also said she is not thinking of striking out on her own and starting a new party.

"This [our faction] is the real Congress," one of her leading supporters, Home Minister Y. B. Chavan, said today.

Mrs. Gandhi contends the fight is between her socialism and The Syndicate's reactionary ideology, but The Syndicate says it is as liberal as she and accuses her of using ideology as a pretext for satisfying her power hunger.

Power Politics

While the prime minister's backers are generally younger and more liberal than The Syndicate's, power politics has come to dominate the fight.

The Syndicate's strategy in Parliament will be to embarrass Mrs. Gandhi on every controversial issue—and if possible oust her. Among these issues are the income-tax delinquency of her food minister, Jagjivan Ram, and her government's foreign-policy failure in being excluded from the recent Islamic conference in Morocco.

Despite The Syndicate's limited strength in Parliament, it still controls the official party machinery on the national level and in several of India's 17 states. The thrust of Mrs. Gandhi's drive now is to try to take over this machinery so that in the next elections

The march is now scheduled to proceed down Pennsylvania Avenue from the Capitol to the Washington Monument grounds. At no time will the marchers be closer than one block to the executive mansion.

Presidential Press Secretary Ron Ziegler said that President Nixon would be in the White House Saturday during the demonstrations.

There had been speculation that Mr. Nixon would spend the weekend at Key Biscayne, since he will be in Florida Friday for the Apollo-12 launch.

UPI.

John N. Mitchell

Mitchell Blames Johnson For National 'Cynicism'

WASHINGTON, Nov. 12 (WP).—Attorney General John N. Mitchell charged last night that political "deception" by the Johnson administration is the reason so many Americans distrust the federal government.

Striking the most partisan notes of his ten months in office, Mr. Mitchell said there is a national "disease of cynicism," thanks to Johnson administration promises that never were kept.

Mr. Mitchell, a trusted political adviser to President Nixon, made the charge in a speech delivered at a $100-a-plate fund-raising dinner in Milwaukee for the Wisconsin Republican party.

He said the Nixon administration, "purposely low key" in its public utterances in contrast to its predecessors, was on its way to restoring public confidence and would "restore civil tranquility to the streets of this nation."

Outlining administration plans for coping with anti-war demonstrations and crime, Mr. Mitchell avoided repetition of past criticism of Congress for failing to enact his crime legislation and trained his guns on what he called "the deception which was practiced over the last few years."

"The prior administration," he said, "attempted to solve problems through the illusion of words—through the projection of succeeding images of impossible dreams which were replaced by more impossible dreams when previous commitments could not be met."

As a result, "the poor and the black who had relied on utopian promises . . . now distrust the government's ability to act on their behalf," Mr. Mitchell said. Middle-class families who counted on the government to control the economy "found themselves caught in increasing inflation" and the nation's youth "now reject the established political process and . . . turn to violence and confrontation," he added.

Mr. Mitchell said the government would honor the right of protesters to congregate and petition peacefully in Washington this weekend but he warned:

"The foreign policy of this government cannot—and will not—be formulated in the streets of Washington or in any other street of this nation . . . The negative cynicism of demonstrators cannot be allowed to replace the affirmative program of those in government charged with conducting our foreign policy and carrying out our national security."

The administration, he said, would achieve social and economic progress through "the methods which I think this Midwest audience understands better than most. We believe in common sense, in hard work and in quiet diligence . . . We believe that the extremists on both ends of the spectrum will be isolated by the great majority of Americans."

Instead of criticizing Congress as he had in recent speeches, Mr. Mitchell said he hoped Congress would approve his department's full request for $275 million this year to help states and cities find new crime-fighting techniques.

He called for narcotics legislation and praised his department's role in the "highly successful" Operation Intercept clampdown on marijuana smuggling along the Mexican border.

"As this administration's anti-crime program moves forward through Congress and into operation, the mood of the nation will change from cynicism to optimism and confidence in the law will be restored," Mr. Mitchell concluded.

Kennedy Joins Anti-Haynsworth Plea to Nixon

WASHINGTON, Nov. 12 (Reuters).—Five members of the Senate Judiciary Committee, including Sen. Edward M. Kennedy, appealed to President Nixon today to withdraw his nomination of Judge Clement Haynsworth for the U.S. Supreme Court.

Their appeal, on the eve of Senate consideration of the nomination, came from five Democratic members of the committee who were in a minority in the committee's 10-to-7 vote for Mr. Haynsworth last month.

Full Senate debate is due tomorrow on the nomination.

Sees No War Soon

Dayan Admits Guerrillas Put Pressure on Israeli Security

By James Feron

JERUSALEM, Nov. 12 (NYT).—Defense Minister Moshe Dayan said today that although Arab guerrillas were making inroads in the occupied areas, Israel was maintaining its strategic military superiority over the Arab states.

In a major review of Israel's defense situation, Mr. Dayan conceded, for the first time, that commandos were forcing Israeli authorities to stiffen security measures in the occupied areas.

Asked if Israel was applying collective punishment in response to these activities, Mr. Dayan said he preferred to call it "neighborhood punishment."

Israeli authorities recently began demolishing homes of Arabs who have been uncooperative in investigations of terrorism or who have declined to come forward with information.

Demolition previously had been limited to those actively engaged in terrorism.

Mr. Dayan minimized the operational achievements of the guerrillas, but said they had an enhanced reputation among Arabs under Israeli occupation.

"The Arabs have more respect for el-Fatah," he said, referring to the largest of the Palestinian guerrilla organizations, adding: "This applies to Israeli Arabs, too."

Security officials have been investigating Israeli Arabs more frequently for terrorism and sabotage because of an increase in incidents in the past year. Some Israeli Arabs have been arrested and convicted.

Speaking in Tel Aviv at a news conference broadcast to Jerusalem journalists, Mr. Dayan said that in the crucial military struggle with the Arab states, Israel had maintained its lead.

After the six-day war, he said, Egypt was left with 40 percent of its planes and 30 percent of its armor. Now, he said, Egypt had 170 percent of its prewar planes and armament.

"All the Arab armies together—Egypt, Iraq, Jordan and Syria—were left with 75 percent of their armor and 55 percent of their planes."

"Now," he said, "they have 150 percent of prewar armor and 160

(Continued on Page 2, Col. 7)

2 Youths Hijack Chilean Jet, But Are Seized, Tied by Crew

SANTIAGO, Chile, Nov. 12 (UPI).—Two teen-age students hijacked a Chilean airliner today but were overpowered by crewmen on the way to Havana, bound with parachute cord and returned to Santiago.

The hijackers were identified as Pedro Varas, 16, and Patricio Dagach, 15. Authorities declined to disclose how they were overpowered other than to say the plane crew put into effect an anti-hijacking operation for which they were trained.

The Caravelle returned here this evening.

Los Cerrillos airport was aswarm with armed guards, security people and hundreds of air-force troopers, submachine guns at the ready.

Two helicopters—both heavily armed—maintained vigilance overhead.

The hijackers were taken to police headquarters in a five-car convoy.

The six-man crew of the airliner, of which Leonidas Medina, 35, was the pilot, was taken to the National Palace, where they were congratulated by President Eduardo Frei. Mr. Medina, a former air force pilot, is Mr. Frei's personal pilot.

The entire episode had comic-opera overtones. When the French-built Caravelle developed engine trouble en route to Cuba, the hijackers made a deal with the airline to disembark the 56 passengers aboard at Antofagasta in exchange for a new aircraft.

The airline, Chilean National, agreed, and supplied the men with a second Caravelle complete with Mr. Medina's crew. That plane took off from Antofagasta for Havana on a leapfrog schedule, but within minutes the captain radioed that the hijackers had been overpowered and were being brought back trussed up.

The original hijack came in flight ten minutes after the plane left Santiago for Puerto Montt on a domestic schedule. The plane was flown to Antofagasta, 800 miles to the north, for refueling. Some of the more nervous passengers were permitted to disembark.

While refueling, the pilot warned the hijackers that his plane was not equipped for overwater flight. They insisted, however, that it be flown to Cuba. But when the plane developed engine trouble only a few minutes after takeoff, and had to return to Antofagasta, the hijackers made their offer to permit all passengers to disembark in exchange for a second Caravelle.

The hijacking was the first of a Chilian airliner, the 55th in the Western Hemisphere and the 25th of a Latin American carrier.

In Any Talks With Bonn

East Germany to Demand Full Recognition

BERLIN, Nov. 12 (NYT).—East German Premier Willi Stoph said today that his regime will demand full international recognition by Bonn in future negotiations between East and West Germany.

Mr. Stoph, in a tough-worded statement, also mentioned West Berlin and its ties to West Germany, telling Bonn to "stop meddling in the affairs of this independent political entity," which in his words "never was part of [West Germany] and never will be."

● Soviet-East German accord seen on unified approach to Bonn. Story on Page 2.

Speaking at the University of Rostock on the occasion of its 550th anniversary, Mr. Stoph said his government remained "ready to negotiate with the government of [West Germany] on an equal basis for the establishment of relations under international law."

Chancellor Willy Brandt has acknowledged that two states exist in Germany, but he has stressed that his government would not grant diplomatic recognition to East Germany, "because relations between us are of a special nature and can never be those of two foreign countries."

Keystone.

Willi Stoph

Mr. Stoph's remarks, the most negative reaction from East Berlin since the new Bonn government took power, appeared to dampen hopes for early negotiations on an easing of tensions and the settlement of outstanding issues between the two regimes.

However, East Berlin observers did not regard the statement as a final rebuff to Bonn's offer for talks. Instead it was believed the East Germans were staking out maximum demands to gain room for possible concessions in future negotiations.

After weeks of deliberations, the East German leaders were reported to have worked out a timetable under which pressure for an all-European security conference is to take pre-eminence before direct East-West German contacts.

Premier Stoph, it was noted, made his remarks two days after the return of party boss Walter Ulbricht from a vacation in the Soviet Union.

Cautious and Conciliatory

Red Unity Seen on Bonn Approach

By Bernard Gwertzman

MOSCOW, Nov. 12 (NYT).—Western diplomats said today they believe the Soviet Union and East Germany have agreed on a cautious, conciliatory approach to West Germany, to pressure Bonn to accede to their long-standing demands.

Pravda, the Communist party newspaper, today ran long excerpts from East Germany's policy statement on the new Bonn government that was published in East Berlin on Sunday—an indication to diplomats here that there are no serious policy differences at present between the two Communist allies on the question of how to deal with Bonn.

The East German statement, similar in tone to public speeches by Soviet Communist leader Leonid I. Brezhnev and President Nikolai V. Podgorny, repeated past calls for "realism" on West Germany's part and held out the prospect for conciliation so long as Bonn met virtually every past condition set by the Warsaw Pact countries.

These conditions included formal recognition by Bonn of the East German state, something Chancellor Willy Brandt has said he would not do.

Diplomats here, who admit to being more skeptical about Soviet professions of goodwill than their colleagues in some Western capitals, said the Russians and East Germans appear to be following a flexible, fluid policy in their tactics but have given no sign that their ultimate strategic aims have altered.

One Soviet goal, the diplomats said, is to further strengthen the status quo in Europe, meaning the permanent division of Germany in the first instance. Over the longer-range, the Russians are thought to be seeking a weakening of the unity of the Western alliance and the isolation of the United States from Europe.

The all-Europe conference on security problems now being advanced by the Warsaw Pact countries is regarded by diplomats from Western countries as a diplomatic ploy to help advance those aims while also bringing greater prestige to East Germany and other Communist states whose images have been tarnished as the result of the Czechoslovak invasion last year.

West Germany is, of course, central to the carrying out of these Soviet goals, diplomats said, and the Kremlin for that reason is thought to be approaching the government in Bonn with extreme caution to see how far it can go in extracting concessions.

For this reason, Moscow is believed to have pressured East Germany not to react too negatively to Mr. Brandt's initial policy declarations seeking closer ties with the East. The Russians are also thought to have assured East Germany that they would not negotiate away its interests in any talks with Bonn.

Western diplomats said they expected the Soviet Union to make gestures in the coming months to improve the atmosphere of Bonn-Moscow relations. They expect talks to begin soon on a non-aggression treaty and on direct air service between the two nations—items that were shelved during the last months of the government of former Chancellor Kurt Georg Kiesinger.

The Soviet Union is also attaching importance to Bonn's adherence to the nuclear nonproliferation treaty—something Mr. Brandt already has said he would sign. To ease his way through the ratification process, the Russians are expected to provide "clarification" on several items such as guarantees that the treaty does not bar West Germany from using nuclear energy for peaceful purposes.

Bonn Reported Ready to Sign Atom Nonproliferation Treaty

By David Binder

BONN, Nov. 12 (NYT).—The government of Chancellor Willy Brandt said today that it had received assurances from the Soviet Union and the United States which sufficed to remove West German objections to signing of the international treaty to bar the spread of nuclear weapons.

A high government source said he expected Bonn's signature on the pact to be affixed sometime next week.

However, ratification by the Bundestag—the lower house of parliament—will be delayed until an adequate agreement on control measures has been reached between the Vienna-based International Atomic Energy Organization, to which the Soviet Union belongs, and the Brussels Euratom organization, to which West Germany belongs.

Chancellor Brandt went before the Bundestag this afternoon to say that West German accession to the nonproliferation treaty would constitute "an element of equalization of rights for the Federal Republic" rather than discrimination against it. "It is not a question of whether we sign, but when we sign," he said.

He spoke in the course of a calm debate that began at 10 a.m. and lasted well into the evening.

Opposition spokesmen led by the former science minister, Gerhard Stoltenberg, said the "time is not ripe" for Bonn's signature and argued that the Russians could use the treaty to "intervene" here.

The debate on an issue that had frequently heated up German political tempers over the last three years was notable for its lack of expletives. In the past, former Chancellor Kurt Georg Kiesinger had accused the United States and the Soviet Union of acting as "atomic accomplices" in drafting the treaty and former Finance Minister Franz Josef Strauss had called it a "cosmic Yalta"—alluding to the 1944 allied Yalta agreement under which Germany was divided.

This morning, Foreign Minister Walter Scheel, who heads the coalition Free Democratic party, resoundingly turned back the Christian Democratic opposition suggestions that the Russians might intervene here under the pretext of nuclear controls by saying that it was not a question of what Moscow might be tempted to do, but rather the security of the Federal Republic within the North Atlantic Alliance which counted.

He added, and Chancellor Brandt echoed him, that the United States had promised West Germany to renew its alliance guarantees at the time Bonn signs the pact.

Mr. Scheel pointed out that as a result of almost three years of negotiations, in which Bonn played a key role, the treaty is headed by a preamble which guarantees unhindered peaceful use of the atom by signatories, provides them with access to the pool of research knowledge accumulated by the atomic powers, ties treaty accession to disarmament efforts by the superpowers, and provides a possibility for rectifying control procedures between the Brussels and the Vienna atomic authorities.

Immediately after it took power Oct. 21, the Brandt-Scheel coalition sought assurances from the United States and the Soviet Union concerning the treaty. Mr. Scheel said today that a Russian note of Nov. 9 put it in writing that there would be no hindrances to the development of peaceful atomic energy projects here. He said Washington, in a parallel action, had assured West Germany that there would be no slowdown in the delivery of fissionable material from the United States to this country and other countries in the six-nation European Common Market's atomic organization.

Science Minister Hans Leussink told the Bundestag that the "advantages of signing for research and technology clearly outweigh the disadvantages." He pointed out that under present agreements West Germany is annually receiving 315 tons of Uranium-235 for its atomic power plants and research projects, but that there is already a need for 1,000 tons a year.

Uranium Supply

Mr. Leussink remarked that to sign meant that Bonn would be enabled to seek more enriched uranium, while not to sign might bring limitations even on the present inadequate supply of fissionable material from the United States.

To ram home his argument he told the parliament that Japan's minister of science and technology, Shiro Kiuchi, had disclosed to him yesterday that the Tokyo government, hesistant up to now about the nonproliferation treaty, is "determined" to sign it soon. Mr. Scheel also said he understands Japan is "preparing the decision to sign."

The government speakers made clear that under the treaty West Germany would have the right to reject controllers it did not like and that through signature it could acquire a seat in the governing board of the Vienna atomic authority.

The impression of most observers who attended the debate was that Mr. Brandt's Social Democrats and Mr. Scheel's Free Democrats had effectively countered the objections to the treaty repeatedly offered by the conservative opposition.

McCarthy Says Lindsay Could Head 3d Party

NEW YORK, Nov. 12 (AP).—Sen. Eugene J. McCarthy said last night that a national third party with New York Mayor John V. Lindsay at its head could emerge if no better candidates are offered.

"Unless the two major parties give voters a better choice than in 1964 and 1968, there will be a third party," said the Minnesota Democrat, an unsuccessful aspirant for the Democratic nomination last year.

"New York City Mayor John Lindsay could very easily be the leader of such a party," he said.

Stewart to Bonn

LONDON, Nov. 12 (UPI).—Foreign Secretary Michael Stewart will make a one-day visit to Bonn tomorrow for talks with West German leaders, the Foreign Office said today. Mr. Stewart will confer Friday with Chancellor Willy Brandt and Foreign Minister Walter Scheel.

Associated Press.

COHN-BENDIT BACK IN ACTION—About 20 leftist demonstrators occupied the Italian Consulate in Frankfurt yesterday but left quietly when police arrived. The demonstrators, among them "Dany the Red" Cohn-Bendit (white sweater), were protesting the arrest of five persons in connection with two Milan bomb plots.

SALT Sessions to Be Held In U.S., Soviet Embassies

HELSINKI, Nov. 12 (Reuters).—The U.S.-Soviet strategic arms limitation talks, after their formal opening here on Monday, will be held alternatively in each country's embassy, it was announced today.

A Finnish government spokesman told a press conference that the formal opening of the discussions, aimed at halting the race for nuclear and missile superiority, will be in the government Banquet Hall near Helsinki's harbor.

After that, the SALT meetings will be held alternatively in the U.S. and Soviet Embassies, but the spokesman did not know which embassy would be the first venue.

Earlier, it was learned, the threat posed by ultra-sensitive eavesdropping devices had ruled out various public buildings in the city and its suburbs.

Heading the delegations will be Gerard C. Smith, director of the U.S. Arms Control and Disarmament Agency, and a Soviet deputy foreign minister, Vladimir Semenov. They will arrive Saturday.

The talks at first will be of a preliminary nature, designed to work out a tentative agenda and to decide whether the conference will be in private.

It is not expected that the preliminary talks will last more than two or three weeks. The meetings would then adjourn for Christmas while the delegations report to their governments.

Though the Finns have made elaborate arrangements, including facilities for 250 foreign correspondents, there has been some speculation as to whether the SALT meetings will resume in Helsinki after the Christmas break.

Vienna has been mentioned as a site for a post-Christmas resumption. If there is agreement to hold full negotiations, the talks could go on for months or years.

Soviet Group in Paris

PARIS, Nov. 12 (Reuters).—A six-member delegation of the Supreme Soviet led by the lower-house speaker, Ivan Spiridonov, arrived today for a ten-day visit to France at the invitation of the National Assembly.

Czechs Halt Some Courses, Apparently to Rewrite Texts

By Osgood Caruthers

PRAGUE, Nov. 12.—Czechoslovak authorities have suspended all courses in pure philosophy, sociology and history in the nation's universities, it was learned today.

The move is seen here as part of the leadership's drive to wipe out all the main pockets of liberal thought that formed the vanguard of support for last year's attempts at progressive reforms.

The faculties concerned with the banned subjects in the major universities were also the main centers of resistance against the Soviet-led invasion last year and against the later restrictions imposed under Moscow's inexorable pressures.

'Quiet in Universities'

"Now things are quiet again in the universities," said a student leader at the Philosophy Faculty of Prague's famed Charles University. "For the first time in more than a year we are not engaged politically."

The authorities have given no public reason for the suspension of the courses. However, students and some faculty members who were willing to discuss the question believe that the Communist regime and particularly the new hard-line minister of education intend to redraft the textbooks and re-orient the curriculum along stringently orthodox lines.

How long it will be before the courses will be resumed is not known. However, according to university sources, sociology as it is known in the West may be dropped altogether.

Some Czechoslovak students who went to Western Europe last year to study such subjects under officially approved cultural exchange programs have discovered that their credits are not accepted.

The latest move is widely regarded in effect as a kind of overall reprisal against a large segment of the nation's university student body, which even early this year staged sit-ins, issued proclamations and bitterly satirical memoranda and sought liaison with industrial workers for joint action to protest the Soviet occupation.

The last evidence of the simmering student unrest came in August on the first anniversary of the invasion, and police reacted violently and with apparent effect against youth demonstrations. Even at that time, however, the university student leaders dissociated themselves from the demonstrations and had decided to take a completely passive attitude.

Even so, the efforts of the Communist leadership to herd students back into a unified and easily controllable national body have not yet proved completely successful.

Various student unions have been dissolved. The leadership of the youth movement has been purged—replaced by men whose recent utterances prove them to be of the most trustworthy orthodoxy.

But in general the students have retreated into an apathetic nonparticipation. They have been able to do so thus far by taking an inordinately greater interest in their studies.

The only genuine success that the authorities can claim so far is that the centers of potential youthful rebellion in thought and action are completely calm on the surface. And the student leaders have assured the leadership that they will try to cooperate in keeping them calm. Their sentiments underneath are now either well concealed or completely subdued.

The only kind of ironic satisfaction the students have found lately is in the commemoration of the time in 1943 when Nazi forces shut down all universities to stamp out a hotbed of resistance. It does not take much for the educated young people of this country to find sly double meanings in the official observations published about that period of grim repression.

Nixon Stand On MIRV Draws Fire

By Richard Homan

WASHINGTON, Nov. 12 (WP).—President Nixon's decision against proposing a mutual freeze on multiple-warhead [MIRV] tests at the opening of strategic arms limitation talks [SALT] next week drew congressional criticism yesterday, including a warning that the military appears to be determining policy.

Sen. Edward W. Brooke, R., Mass., said: "I think it's a mistake. I still hope the President may reconsider."

If MIRV is not given priority at the talks, Sen. Brooke said, he would ask for Senate action on a resolution sponsored by himself and 41 others that calls on the President to seek an agreement to halt tests of the multiple-warhead missiles.

Sponsors of a similar resolution in the House—S. Jeffery Cohelan, D., Calif., and Donald M. Fraser, D., Minn, said the decision indicated that the military would have a greater voice than expected in the arms-limitation talks with Russia.

Mutual Moratorium

Some congressmen had urged that the United States open the preliminary talks in Helsinki next week by proposing a mutual moratorium on multiple-warhead-missile testing while discussions are under way.

The Nixon administration has decided, instead, to first seek agreement with the Soviet Union on a clear definition of the scope of the SALT talks and defer substantive discussions until early next year.

Sen. Brooke said yesterday that there was "divided opinion" among the President's advisers but that the decision was based on "the prevailing opinion within the administration."

"It's an unfortunate decision," Rep. Fraser, a member of the House Foreign Affairs Committee, said. "But an even larger tragedy is the apparent dominance of the hard-line military point of view in the councils of the executive branch. It's not the decision itself so much as what is suggests as to who's running the show."

Rep. Cohelan, who attended a conference of leading government and non-government arms strategists last week, said that the "majority clearly supported a MIRV moratorium as the top item on the agenda" for the SALT talks.

But representives of the Defense Department "were very much against it," he said, "specifically [Dr. John S.] Foster, who was outspoken on the matter." Dr. Foster heads the MIRV development effort in the Defense Department.

Bomb Set Off In Fiat Plant During Strike

ROME, Nov. 12 (AP).—A small bomb exploded in Turin's Fiat car plant today as unions called a sudden strike and workers raided Fiat offices, manhandling white-collar workers and injuring a watchman.

In Rome, meanwhile, Labor Minister Carlo Donat Cattin presided at a meeting of union officials and management representatives. The minister was mediating labor contract talks for Italy's 1.3 million metalworkers.

The bomb, wrapped in paper, exploded inside a Fiat department. It caused only minor damage. Yesterday, a bomb damaged a car and shop windows in Milan and several small bombs caused panic among student demonstrators in Naples.

In the Chamber of Deputies today, a shouting match developed during a discussion of the Naples bombings, in which 17 members of the neo-Fascist Italian Social Movement party (MSI) were arrested. Communist deputies accused the MSI deputies of cowardice. The MSI representatives replied.

Ushers Halt Fray

Parliamentary arms flailed the air. Blows allegedly were struck. And ushers of the Chamber of Deputies stepped forward to perform their customary duty of separating angry parties. No one was hospitalized.

Today, unions called another sudden stoppage at metal plants in Pistola near Florence. In Rome, striking bank employees marched in the center of the city.

Rome's bus drivers and conductors returned to work after an 11-hour strike, while public transport workers struck in Milan, Turin, Venice and other cities.

The strike at Fiat was a reply by the unions to management which called police into the plants yesterday to help white-collar workers cross a picket line.

White-collar workers largely ignored the strikes. Only four departments at Fiat were shut down by the strike.

A general strike to protest the rising cost of living and a housing shortage was staged in Cagliari, the capital of Sardinia. Plants, shops and schools were closed. About 4,000 persons marched through Cagliari's streets. Extremists carrying pictures of Mao and Stalin scuffled with other demonstrators. No one was injured.

Sees No War Soon

Dayan Admits Guerrillas Pressure on Israeli Securi

(Continued from Page 1)

percent of prewar planes." He said the Arab military forces were "still expanding."

'We Are Better Off'

"But we have improved, too," he said. Without offering comparisons, he said: "Today we are better off than before the six-day war."

He said Israel's strategic objective was to "prevent escalation to all-out war." Putting it simply, he said, "We want the Arabs to reach the conclusion that they will lose the next war."

Mr. Dayan said he did not expect a renewal of the war "in the next few months." He added that he "expected a new phase next spring," but said this "would not necessarily mean a reopening of the war."

He spoke of military activities across the Suez Canal as especially costly to the Egyptians.

He said that in the past seven months, there had been 13 Egyptian air attacks, 15 landings by infantry units in commando formation and one naval attack. The result, he said, was 49 Israeli dead and wounded. The Egyptians, he said, left 30 casualties, mostly dead.

Israelis conducted 65 air attacks and "a number" of commando forays. "We had 20 casualties and inflicted more than 1,000 casualties, including 200 in the Sept. 9 amphibious assault."

Mr. Dayan said that 93 percent of Israel's dead and wounded were suffered along the borders and only seven percent in sabotage and terrorism in the occupied areas and within Israel.

Counting only fatalities, he said that 76 percent of the losses were inflicted on the front and 24 percent in the interior.

Israel's occupation policy, he said, was to make sure t Arabs knew that Israel the governing authorit this procedure, they rights but they also obligations."

Mr. Dayan said 43 benn destroyed in th months in the Gaza St in the West Bank. S observers believe the figure to be several hun claim the figure to thousand.

Mr. Dayan said Israel ed 71 Arabs since the w versive activities.

Sporadic Continues Suez Can

TEL AVIV, Nov. 1 Sporadic shelling conti along the northern sec Suez Canal, but a milit man said no major cl reported.

He said Jordanian forc the invaders near Aqab and Jordan's only sea the northern tip of Gulf.

The intruders left F number of mines and blo military uniforms," he spokesman did not say raiders were involved.

Israelis Refuse Entry to Nutting

JERUSALEM, Nov. 12 (UPI).—A former British minister, Anthony Nutting, has been refused permission to visit Israel, a Foreign Ministry spokesman confirmed yesterday.

The spokesman said that Mr. Nutting made provocative anti-Israeli statements to Arab students in Beirut and his presence in Israel, therefore, was considered undesirable at this time.

Mr. Nutting resigned the post of minister of state for foreign affairs in the Eden government in October, 1956, because he opposed the Suez invasion by Britain and France acting in concert with Israel.

3 Nasser Aides Reported Will Go to Russia for Ta

CAIRO, Nov. 12 (UPI).—President Gamal Abdel Nasser will dispatch three of his top aides to Moscow next week for "important" political and military talks with the Soviet government on the Arab-Israeli conflict, the authoritative newspaper al-Ahram said today.

Anwar el-Sadat, a member of the Arab Socialist Union's Supreme Executive Committee, will lead the delegation, which also includes Foreign Minister Mahmoud Riad and War Minister Gen. Mohammed Fawzi, al-Ahram said.

Mr. Sadat is believed to be the second-ranking man in the ruling hierarchy after Mr. Nasser.

Observers noted that the announcement of the visit was sandwiched between:

● The announcement Monday by the Arab Defense Council that political efforts to solve the Mideast conflict "have failed into an impasse."

● A report on the Ara conference which is sch Dec. 30 in Rabat, Moroc meeting will plan Arab against Israel.

"The agenda is being presently for these impor [with Russia], which are the first degree at a c change of views on vari of interest to the two foremost of which is the al-Ahram said.

The Arab League issue tions for the summit to League sources said.

The sources said that th tions would include the agenda based on the Defer cil's resolutions and wo the mobilizing of Arab politically, militarily and cally against Israel.

The sources said that th would also include a call port for the Palestinian r movement and for Arabs i occupied territory.

Party Expels Mrs. Gandhi; Old Guard Sees 'Indiscipline'

(Continued from Page 1)

her faction will be able to pick the candidates, and to retain the party's ballot symbol of two yoked bullocks—crucial to winning the votes of the scores of millions of illiterate villagers who have been voting for the symbol for years.

On her side, the 51-year-old prime minister has the support of her entire cabinet and seven of the ten Congress party chief ministers—the heads of government in the states controlled by the party.

The party's three other chief ministers are with The Syndicate. But the nucleus of the Syndicate leadership are the older barons of the party—Siddhavanahalli Nijalingappa, the party president, whose resignation Mrs. Gandhi is trying to force; Morarji Desai, whom Mrs. Gandhi ousted from the finance portfolio in her cabinet in July; Kumaraswami Kamaraj, 67, the party boss of Tamil Nadu (formerly Madras) state; S. V. Patil, 69, the party boss of Bombay, and Atulya Ghosh, 68, party boss in West Bengal.

Mrs. Gandhi's expulsion was carried out today by The Syndicate acting as an 11-member majority of the party's 21-member top policy board, the Working Committee. (The other ten are in her camp.)

The expulsion resolution was passed by this Syndicate group at a three-hour meeting in the heavily guarded party headquarters.

The resolution, calling this "the saddest moment in the history of the Congress," said they were "regretfully obliged" to remove her from the party because of "her constant denigration of the Congress organization, her peculiar attitude to questions of [party] discipline, her basic and overriding desire to concentrate all power in her hands."

Tonight, Mrs. Gandhi and her inner circle met at her residence and passed a resolution of their own—declaring the expulsion move unconstitutional and branding The Syndicate as "a handful of...party bosses" with "dictatorial attitude ... arrogating to themselves the authority to stifle the legitimate voice of party organs."

"Are we to submit to them," the resolution said, "or cleanse the organization of these undemocratic and fascist practices?"

Ironically, it was The Syndicate that installed Mrs. Gandhi as prime minister nearly four years ago in the mistaken belief that she would be pliable.

She has fought with them ever since, although not until a party convention at Bangalore four months ago—at which The Syndicate pushed through an anti-Gandhi man as the party's nominee for the figurehead Indian presidency—did it take on crisis proportions.

Angered, she backed an independent candidate, V.V. Giri, for president and he won.

Review Promised for Early 1970

Israeli Draft Lottery Bill Imminent After Compromise on Reform

By Richard L. Lyons

WASHINGTON, Nov. 12 (WP).—Prompt passage this month of President Nixon's draft lottery bill was assured yesterday when committees in the House and Senate agreed to wait until next year to consider broader reform measures.

The agreement came after Chairman F. Edward Hébert of the House Armed Services Committee had threatened to kill the lottery bill with an ultimatum from Mr. Hébert's committee to the Senate Armed Services Committee.

Mr. Hébert had said that unless the Senate committee agreed to report the lottery bill by Nov. 15, his committee would not take up the measure at all.

Mr. Hébert's ultimatum provoked a storm of protest from Senate doves, who charged that the House chairman was trying to railroad the lottery bill through Congress without adequate consideration of its implications.

Mr. Hébert, who had insisted that the lottery bill was a "must" measure, finally agreed to report the bill to the House by Dec. 15 if the Senate committee would promise to report it by Nov. 15.

Mr. Hébert's committee is expected to take the narrow lottery bill or nothing this year, and given the promise of chairman John Stennis, D., Miss., to hold broad reform hearings before Feb. 15, reformers led by Sen. Edward M. Kennedy, D., Mass., agreed to go along.

Sen. Kennedy agreed not to offer, and in fact to oppose, any amendments to the bill. Sen. Stennis in turn said he was "greatly encouraged" that the House-passed bill would pass the Senate without change and said he will hold brief hearings, perhaps next week.

Sen. Stennis, Sen. Kennedy, leaders of both parties and a half-dozen other reform-minded senators worked out this agreement at a meeting in the office of Majority Leader Mike Mansfield, D., Mont.

Sen. Stennis had argued that it is too late in the year to begin a comprehensive review of the draft laws. His committee is ready to approve the lottery bill but only with assurances that reformers will not try to load it up with amendments. Sen. Stennis promised broad hearings next year and said he would personally make "every reasonable effort" to get a reform bill to the Senate.

Sen. Kennedy agreed that it would be better to give reform proposals careful committee consideration rather than write the bill on the floor. He said the pledge from Sen. Stennis and support for broad reform by Sen. Margaret Chase Smith, R., Maine, senior Republican on the Armed Services Committee, "give the assurances I need to support the bill as it is."

Sen. Kennedy said he could speak for no one except himself, but he said he heard no opposition registered at the meeting to passing the lottery bill now and considering the rest later. A check with others at the meeting indicated that most will go along, certainly enough to defeat any amendments.

A proposal to force a draft bill to the floor next year by moving up the expiration date for the present law by six months to December, 1970, was rejected by Sen. Stennis. Sen. Kennedy gave way on this in return for Sen. Stennis's promise.

Sen. Mansfield said he is opposed to the lottery bill but will take it up soon after the committee approves it. He favors more equitable treatment with very few exemptions from service. The lottery would provide an equitable system for calling those eligible for the draft, but does nothing to change the standards for exemptions of college students and others.

The administration's proposed lottery would work this way:

Dates of each day of the year would be placed in a hat and drawn out one by one. If Aug. 2 was drawn first, for example, those whose birthdays fall on that date would be called first. If Nov. 12 was drawn last, those born on that date would be the last called.

Mr. Nixon proposed to change, by executive order, from the policy of calling the oldest first to a policy of taking the youngest first, and reducing the period of prime exposure to the draft from seven years to one. The 19-year-olds would be called first, and when a youth became 20 he could reasonably expect that he would not be drafted except in time of war.

In other congressional action:

● A $1.45 billion military construction bill containing seed money for President Nixon's Safeguard anti-ballistic-missile system was approved by the House Appropriations Committee today and sent to the floor for expected action tomorrow. The measure includes $16.6 million to begin Safeguard deployment, $2.5 million for an underground command center in the Rocky Mountains and $14.1 million to develop Kwajalein Island in the Pacific for full-scale tests of the ABM system next year.

Most Safeguard deployment money for fiscal 1970—$746 million has been authorized—is in another bill not scheduled for congressional action until December.

The bulk of the money in the bill approved today is for construction projects, including family housing, at military bases in this country and abroad.

● The House Appropriations Committee today voted $25,039,000 for various Army and Air Force construction projects at U.S. bases in Germany, but sliced an additional $14,013,000 from the planned construction program.

The funds were included in the military construction appropriations bill for the current year. Some of the reductions were made by the Appropriations Committee and some had failed to be authorized earlier this year.

Associated Press.

PERSISTENT NORTHEASTER—Raging surf battering the seawall at Hull, Mass., as New England remained waterlogged this week from nine straight days of rain. It has all come from a northeast storm wandering aimlessly about off the coast.

W. German Passion Play Being Revised

OBERAMMERGAU, West Germany, Nov. 12 (AP).—The mayor of Oberammergau said today that a new version of the village's Passion Play is being prepared and he is satisfied it will not contain any anti-Semitic passages.

Mayor Ernst Zwink said that a committee will decide on the final text for the 1970 play this week "and we feel it will be satisfactory to persons who have objections to the old version."

The American Jewish Congress repeated an allegation yesterday that the play contains anti-Semitic passages and asked the West German government and Julius Cardinal Doepfner of Munich to urge Oberammergau to revise the text.

Mr. Zwink said he was aware of the telegram the congress sent Cardinal Doepfner. "The objections of the American Jewish Congress have led us to do a lot of thinking," he said. "I can see where there are possibly passages that might be construed as anti-Semitic by some persons.

"The congress's objections have been taken into careful consideration during preparation of the new text," he added.

Father Schaller's Version

Mr. Zwink said the new text would include several revisions, including parts taken from a version written by the Rev. Stephan Schaller, a Benedictine monk and high-school principal near this Alpine village.

The mayor said the village had rejected Father Schaller's version, commissioned by Cardinal Doepfner in 1967, because some parts departed too radically from the village's traditional text, written more than 100 years ago.

The Oberammergau play, which dates back to the village's deliverance from the black plague more than 300 years ago, is performed every ten years.

Charges that the play contains anti-Semitic overtones have been made repeatedly and in 1966 the director of the 1970 play, Hans Schwaighofer, resigned. He said his efforts to eliminate what he called the anti-Jewish passages had been continually resisted by the villagers.

Debate over the play's text became more intense in 1965 when the Vatican Council absolved Jews of any collective guilt for the death of Christ.

The text currently used is based on a version written by a local priest in 1860 and portrays the Jews in general as a fiendish, bloodthirsty group from whom the "kingdom of God will be taken away."

A cast of 700 villagers performs the eight-hour play.

McNamara and 'Whiz Kids' Cost U.S. Its Lead in A-Subs, Rickover Says

WASHINGTON, Nov. 12 (UPI).—Adm. Hyman G. Rickover, a pioneer in the development of atomic-powered submarines, says former Defense Secretary Robert S. McNamara "and his whiz kids" cost America its lead in nuclear submarines over the Russians.

A heavily censored transcript of Adm. Rickover's testimony at a House Appropriations subcommittee hearing in July was made public today. He said things have not improved much at the Pentagon under a Republican administration.

"The prime example" of what he termed "massive irresponsibility," he said, "is the regime of the recent Secretary of Defense and his whiz kids. With their cost analysis and computer methods they managed to lose us the lead we had in nuclear submarines and allowed the Soviets to catch up with us to a dangerous degree."

He said the Soviet submarine force is about 375, compared with America's 145, but the Russians have 63 nuclear submarines to 84 for the United States.

America has 22 additional nuclear subs under construction but, Adm. Rickover said: "By next year the Russians will probably have more nuclear submarines than we."

The reason, he said, is that U.S. military technicians are subject to civilian managers with no expertise. "We are forced to do our work surrounded by this massive irresponsibility," he said.

Adm. Rickover said 25 percent of the civilian force in the Pentagon should be fired and not be replaced.

Alleged Influence-Peddling

House Speaker's Associates Tied to Second SEC Scandal

By E. W. Kenworthy

WASHINGTON, Nov. 12 (NYT).—Federal investigators have been looking into a second case of alleged influence-peddling at the Securities and Exchange Commission by an old friend and the former top aide of House Speaker John W. McCormack, it was learned yesterday.

The old friend is Nathan M. Voloshen, 71-year-old New York lawyer-lobbyist. The top aide is Dr. Martin Sweig, 46, former administrative assistant to the Massachusetts Democrat.

Mr. Voloshen was one of 16 defendants named in a complaint filed by the SEC on Oct. 16 against the Parvin Dohrmann Co. The complaint sought an injunction against continuation of what were alleged to be fraudulent activities by company officials and a "control group" they had organized.

The complaint charged that Mr. Sweig, at the request of Mr. Voloshen, had arranged a meeting last May 6 between company officers and Hamer H. Budge, SEC chairman, in an effort to get the SEC to lift a ban on trading in the company's stock.

$50,000 'Expense'

According to the complaint, Mr. Voloshen received $50,000, which Parvin Dohrmann treated on its books as "a legal expense."

On the filing of the complaint, Rep. McCormack suspended Mr. Sweig without pay, pending action by two federal grand juries in New York and Baltimore that are also inquiring into allegations of influence-peddling by Mr. Sweig and Mr. Voloshen.

Now, it has been learned from official sources, investigators for federal agencies have also inquired into alleged efforts by Mr. Voloshen and Mr. Sweig to intervene with the SEC on behalf of a company called Trimatrix, Inc., with offices in New York City.

These officials declined to state specifically what favorable rulings Mr. Voloshen and Mr. Sweig had allegedly sought from either SEC career officers or the commission itself. In refusing to discuss the allegations of further use of the Speaker's office by Mr. Sweig and Mr. Voloshen to exert influence, these officials intimated that the Trimatrix case was the subject of testimony before the New York grand jury.

Fifth Amendment

These same officials said, however, that when federal investigators questioned Mr. Sweig in early October, they asked questions not only about his relations with Mr. Voloshen in the Parvin-Dohrmann case but also in the Trimatrix case.

When investigators sought to question Mr. Voloshen, according to these sources, he refused to answer, pleading his rights under the Fifth Amendment against possible self-incrimination.

Trimatrix, Inc., filed papers of incorporation with the New York secretary of state in May, 1968. The company, a speculative venture, was organized by Michael Hellerman to develop and market a device which would electronically verify that a person presenting a credit card was the person to whom the card was issued.

On Sept. 5, the company filed with the SEC a registration statement setting forth facts about the company's officers, its capitalization, initial stock distribution among promoters and officers, a description of the company's project and its speculative nature. Such a statement is required before a public offering of stock.

At the company's request, this statement of registration was withdrawn. On Dec. 30, 1968, a second registration statement was submitted to the SEC, with some changes in the officers and in stock allocation. This second statement was also withdrawn on May 13, 1969.

In explanation of the withdrawal, the company said its officers had decided that the intended public offering of 500,000 shares at $5 per share "would be inappropriate under all of the circumstances."

However, federal officials and some members of the company's board of directors indicated in telephone interviews that the real reason for the withdrawal of the registration statements was a failure to satisfy a critical appraisal by the SEC.

Thus, William L. Weiss, the company's attorney, said Monday, "we have had our involvement with the SEC" and William Glacken, a board member, said, "I understood there was some trouble with the principal stockholder."

NATO Unit Sets Policy On A-Arms

Political Guideline For Battlefield Use

WASHINGTON, Nov. 12 (UPI).—Members of the North Atlantic Treaty Organization's Nuclear Planning Group announced today that they have approved new political guidelines for the battlefield use of nuclear weapons.

There was no elaboration concerning the nature of the political guidelines in the communiqué announcing their adoption, but they presumably would deal with non-military matters such as opposition to use of nuclear weapons under any circumstances or in any form.

The planning group, which ended two days of discussion, included U.S. Defense Secretary Melvin R. Laird as well as the defense ministers of Belgium, Denmark, Germany, Italy and the United Kingdom. Turkey was represented by Ambassador to the United States Melith Esenbel and the group was headed by NATO Secretary General Manlio Brosio.

The communiqué said the guidelines, which apply to the defense of Europe and Turkey, were approved "as part of a continuing process for improving the defense of the alliance, and on the basis of thorough studies."

Basis for Planning

The communiqué said the guidelines will be used "as a basis for future military planning.

"Work in this field will continue to be developed and elaborated. Ministers initiated a further program of studies to this end," it said.

The communiqué also said the defense ministers reviewed the alliance's procedures for consultation on the possible use of nuclear weapons "in defense of NATO on the basis of the existing established principles."

Results of the meeting will be forwarded to the Nuclear Defense Affairs Committee and the Defense Planning Committee of NATO for approval.

The ministers also voted to hold their next meeting in Italy in the spring of 1970.

U.S. Priests Ask Bishops for Role In Making Policy

WASHINGTON, Nov. 12 (NYT).—A representative of the nation's Roman Catholic priests addressed the American bishops for the first time yesterday and called upon them to surrender virtually all of their collective powers to a new council of bishops, laymen, priests and members of religious orders.

The Rev. Patrick O'Malley of Chicago told the assembled prelates that a "trust gap" existed between them and their priests and urged a "radical change in the decision-making nature of the church."

The alternative, he declared, was "revolution instead of evolution." Specifically, the 37-year-old priest urged the bishops to admit that they could not lead the church on their own and "begin to ask us for help," agree to bring along priests selected by their peers as full voting members at the next meeting of the hierarchy in San Francisco in April and use this as a "concrete first step" toward the formation of a national policy-making board that would "involve as much as is possible the total church."

He spoke at the semi-annual meeting here of the National Conference of Catholic Bishops. Father O'Malley is president of the National Federation of Priests' Councils.

Cosmos-309 Launched

MOSCOW, Nov. 12 (UPI).—The Soviet Union today launched another unmanned space research satellite in the Cosmos series. Tass said Cosmos-309 was orbiting the earth once every 90.1 minutes at heights from 136 miles to 238 miles and at an angle of 65.4 degrees.

Red Artillery Near Cambodia Shells 2 Green Beret Camps

SAIGON, Nov. 12 (UPI).—North Vietnamese guns near the Cambodian border pounded two Special Forces camps with 40 mortar and recoilless rifle rounds in a simultaneous attack at dawn today, military officials said.

The shells hit the Bu Prang and Duc Lap outposts, about 112 miles northeast of Saigon, just as the camp defenders were beginning to emerge from their bunkers for the day. Sources said casualties were light, with no fatalities.

North Vietnamese regulars began putting pressure on the Green Berets' camps last month. Two weeks ago they forced the abandonment of three artillery bases near Bu Prang. They were believed to have about 5,000 troops in the area.

He said several hundred Vietnamese mercenaries today patrolled the hills from where the gunners had harassed the camps, but had been unable to locate any of the 75-mm. recoilless rifles or 120-mm. mortar tubes.

Light and scattered fighting was reported today near the outposts between the Communists and South Vietnamese forces, now numbering almost 5,000 men. There was no word of casualties on either side.

Clash Near DMZ

Yesterday, U.S. forces killed 70 Viet Cong and 11 North Vietnamese regulars during an 11-hour battle just south of the Demilitarized Zone—the heaviest fighting in the area in more than a month.

In the DMZ battle, the Americans, reinforced by armored units, lost two men killed and ten wounded.

Yesterday's battle was the heaviest fighting near the DMZ since the bulk of the 3d Marine Division, stationed there, began withdrawing from Vietnam as part of President Nixon's redeployment program.

Crash Kills 8 Koreans

SAIGON, Nov. 12 (UPI).—Eight South Korean Army officers were killed yesterday when a jet transport plane crashed during a storm two miles southwest of Qui Nhon and 248 miles northeast of Saigon.

Korean spokesmen said five of the officers, who included three full colonels, were members of the staff of Lt. Gen. Lee Sae Ho, commander of South Korea's 60,000-man force in South Vietnam.

3 Men Hold Up Armored Car In Brooklyn, Get $1.4 Million

NEW YORK, Nov. 12 (AP).—Three armed men robbed an armored truck of $1.4 million in cash receipts from Aqueduct race track today as the truck made a lunch stop on the way to the bank, police said.

Police gave this account:

Two of the three guards waited in the truck, parked on a Brooklyn Street, while the third, Thomas Raftery, ate in a restaurant.

The robbers followed Mr. Raftery from the restaurant and jammed a gun in his back as he was about to get back into the truck.

Guard Disarmed

When another guard, James Jerrigan, a 30-year veteran with the firm, reached for his pistol, one of the robbers told him, "If you want to enjoy your retirement, drop that thing."

Mr. Kerrigan complied. The thieves then disarmed the third guard, Barry Ketteridge.

The guards were forced to drive around Brooklyn for a while until the robbers ordered them to stop and transferred the nine bags of money into a getaway car.

A spokesman for Aqueduct said the money represented two days' receipts at the Queens track. He said the money usually goes to the bank daily, but it was not picked up yesterday because of the Veterans' Day holiday.

Anti-War Actors Urge Boycott Of Their Movies

WASHINGTON, Nov. 12.—Five American actors appearing in some of the nation's biggest box-office hits called today, for a boycott of their films on Friday as an expression of opposition to President Nixon's Vietnam policies.

Targeted for the boycott were "Alice's Restaurant," "Midnight Cowboy," "Butch Cassiday and the Sundance Kid," and "Easy Rider."

Their stars—Arlo Guthrie, John Voight, Paul Newman, Peter Fonda and Dennis Hopper—said potential movie-goers would be achieving two effects: "One, they would be endorsing Friday's Vietnam Moratorium and its theme of "no business as usual until the boys come home," and two, they would be challenging Mr. Nixon's assertion that a "great majority of silent fellow Americans endorsed his approach to disengaging the United States from Vietnam."

Chaperoned by two prominent congressional doves, Reps. Allard Lowenstein, D., N.Y., and Rep. Don Edwards, D., Calif., the five stars met the press in the refurbished House caucus room.

Christmas vacation before your Christmas vacation. On the S/S France.

This year, the France leaves Le Havre and Southampton for New-York on the 13th of December (half round-trip fare from $239).

Five days in a deck-chair. Or in a swimming pool. Or bridge. Or movies. Nothing to do, or lots to do. It's a great way to sneak up on Christmas looking at the sea.

On the France the Faubourg St Honoré is at your cabin door.

You can start your Christmas purchases in the middle of the Atlantic. Or you can even learn the recipe for "Coupe givrée Bibesco" for your Christmas party.

Five restful days to get to New-York. And then you'll have five more days before you get home. Enough time to buy the tree and the American gifts you miss.

Go and see your travel agent to day. Or call us. Or write us.

Europe's New Security Patterns

The Warsaw Pact's renewed proposals for a European Security Conference are more likely to develop into a process than an early event.

A conference of 31 countries, or even the preparatory Helsinki meeting which the East now proposes be held early next year, could only be a propaganda forum unless concrete agreements had been negotiated in advance. Bilateral and multilateral exploration of such agreements fits in with the Nixon concept of an "era of negotiation" and has gained Western favor.

There is even a possibility now that the annual NATO ministerial meeting in December may accept "in principle" the idea that a conference can ultimately be held when agreements are in sight. But what is significant about the current trend is not the imminence of such agreements but the approach of a new form of East-West dialogue.

The vague idea previously advanced by Moscow that a comprehensive new security system in Europe replace NATO and the Warsaw Pact is no longer in the forefront of Eastern proposals. Instead of dissolution of NATO and withdrawal of American troops, priority now is given to a network of bilateral East-West treaties renouncing force and the threat of force.

But Moscow's central objective remains unaltered. It is to confirm the status quo in Europe, including the division of Germany, and to achieve Western recognition of Eastern Europe as a Soviet sphere of influence. What has changed is the reaction in the West—and especially in Bonn—to Moscow's proposals.

Until 1966 the West insisted that the reunification of Germany must precede new security arrangements in Europe, lest the division of Germany and Europe be frozen. A coming together of the two parts of Germany, it is now realized, can only be achieved with the consent of Germany's eastern neighbors. The prerequisite is a long period of detente and improved relations between West Germany and Eastern Europe.

The new Brandt government in Bonn now plans to step up negotiations with Moscow for a network of agreements with the East —including East Germany—renouncing force. Bonn is prepared to give East Germany increased recognition as a second state within the German nation and, in separate negotiations with Warsaw, to confirm the Oder-Neisse frontier with Poland. In return, Bonn seeks to move toward diplomatic relations with Poland, more travel and contacts between East and West Germany and, ultimately, liberalization of the East German Communist regime.

It is in this context that the NATO countries now are considering a much broader agenda for discussion with the East. Other NATO countries are prepared to negotiate renunciation-of-force agreements. Exchange of observation posts on both sides of the Iron Curtain is suggested to provide assurance against surprise attack. Mutual force reductions by NATO and the Warsaw Pact could maintain the military balance in Central Europe at lower cost. Improved access arrangements for West Berlin could reduce the danger of a clash there. East-West economic and cultural contacts could usefully be broadened.

None of these negotiations can be expected to achieve dramatic results quickly or to terminate the 24-year military confrontation in the heart of Europe. But the dialogue itself would be a stabilizing factor, for it could not continue if there were a new Berlin crisis, harassment on the access routes or other Soviet menaces toward the West.

THE NEW YORK TIMES.

Confrontation

Soviet 'Volunteers' For Arab Forces

By Joseph Alsop

WASHINGTON.—The left-wing intellectuals have long since proclaimed the cold war a deplorable figment of the imaginations of deplorable great men, like Winston S. Churchill, Harry S. Truman and Dean G. Acheson. But those who still oppose genocide—and more particularly the Jewish left-wing intellectuals—had better have another look at what is happening in the Middle East.

In his recent speech, Gamal Abdel Nasser rather superfluously announced that Egypt was at war with Israel. It was a superfluous announcement because every realistic observer knows that Nasser would cheerfully "strengthen his leadership of the Arab world," by a vast human sacrifice of every man, woman and child of Jewish blood in all of Israel.

But the real cause for worry in Nasser's speech was the shrill, untruthful emphasis on the Americans serving in the Israeli Army. There are indeed a few young Jewish Americans who have understandably found a new meaning in life in Israel.

This reporter has written about three or four of them, in uniform and in the kibbutzim. But when a Soviet puppet—which is what Nasser really is today—starts talking in this manner, you should always read the speech as though it were written in mirror-writing.

In other words, you should assume that the Soviets are thinking about doing, or are already planning to do, what spokesmen like Nasser charge the United States with doing. In the present case, that means they are at least thinking about Soviet "volunteers" serving in the Egyptian and perhaps the other Arab armies or air forces.

Critical Element

Thus far the Arab armies and air forces have been hopelessly outclassed by the Israelis. But the air is the critical element, as the six-day war proved. The brutally crass Soviet attempt to steal a Mirage fighter plane from the Lebanese Air Force also proved that the Soviet war-planners share this opinion.

Until they get all of their 50 American Phantom jets, the Israelis must mainly rely on their remaining French Mirages. The attempt to steal the Lebanese Mirage fighter obviously revealed a desire to find out, in simulated combat, how to beat Mirages with the equivalent Soviet fighter planes, the MiG-21s, of which the Egyptians have a great many by now.

Furthermore, Soviet personnel are now workin the Egyptian armed forces level from battalion to to the high command. Th Egyptian air-warning and trol system is almost co Russian.

Worse still, Soviet pilots ready flying Egyptian pla rather, Soviet planes with tian markings), if the Isr telligence is correct. In th Israeli intelligence abo Middle East has been available. And the Israelis sure that Russian fliers ready begun to undertake sive missions" primarily Egyptian air patrol over C

Add these facts to the speech, and you find a da tern. It is only a small sh Soviet pilots flying "defens sions" to Soviet pilots tur over Sinai, and indeed in ev vital areas, in the MiG-21s Kremlin has given to Nas

War of Attritio

Israel is now successfully ing a permanent state of the Arabs. But unlimited of Soviet "volunteers," flyin lessly replaced supersonic actually produce the kind of attrition that Nasser ha gloriously boasted about. now the danger, not imm certainly, but real enough very worrying.

The Israelis have—or beli have—a safeguard again danger, in the form of des of the Egyptian airfields craft by a preventive air One must hope they ar driven so far. One must tra hard, moreover, beca other things that have be pening in the Middle East ply fit the pattern sugge the Nasser speech.

It cannot be proved as there is little doubt that money and Soviet agents role in the Arab-extremist Libya. Since Syria is far Soviet puppet than Egypt, t be no doubt at all about the lin's role in the Syria-base on Lebanon's independence, half successful, by the Ara rillas whom the Soviets no openly support.

Another coup in Saudi was supposed to coincide w coup in Libya, but it was for ly aborted by King Feisal. if we are not ready to genocide in Israel, the States may have to face very grave cold-war problem Middle East.

Gesell on the Unwanted Child

By James Reston

WASHINGTON—The long battle to modernize the abortion laws of this country and wipe out the quacks and extortionists who have been operating in this field is finally getting some serious help from the federal courts.

Appropriately, it was United States District Judge Gerhard A. Gesell, son of the famous pediatrician, Dr. Arnold Gesell, who came up with an answer to the problem of the unwanted child. He ruled that any "competent licensed practioner of medicine" could legally perform an abortion in the District of Columbia for reasons satisfactory to himself and his patient.

Judge Gesell asserted that the 1901 District law that legalized abortion only when "necessary for the preservation of the mother's life or health" was too vague and placed upon the defendant the responsibility of proving that the abortion was necessary.

'Current Conditions'

Accordingly, he not only declared it unconstitutional but invited the U.S. District Attorney's office to appeal his ruling directly to the Supreme Court of the United States, and urged the Congress to re-examine the abortion statute "in the light of current conditions."

No doubt there are sensitive human and religious questions involved in this fundamental personal issue, but the "current conditions" are well known. The abortion mills are among the most ghoulish and lucrative rackets in this country. They favor the rich who can pay the high fees. Many of them are run by men and women who are neither competent nor licensed, often under the control of the most notorious racketeers, and therefore dangerous to the life of the patient and respect for law in the community.

The "current conditions" in the courts are equally unfair and anarchic. Most states, like New York, have recognized the problem but have not been able to overcome the opposition of religious organizations and timid politicians. Others have modernized their laws: For example, Arkansas, California, Colorado, Delaware, North Carolina, Georgia, Maryland, Kansas, New Mexico and Oregon, thus creating an abortion traffic across state lines by patients who can afford the cost of transportation and hospitalization.

The old laws—New York's has been on the books for 86 years, New Jersey's for 120—have not, of course, stopped abortions but merely diverted them into illegal channels or into areas where abortion is legal. The British, for example, have had legal free abortions under the National Health Service since April, 1968, and this has created a transatlantic traffic of such proportions that it is now a subject of concern to the British government and medical profession.

In the first six months of Maryland's liberalized abortion law, 743 legal abortions were performed, only a few of which would have been legal under the former law. Applications from out-of-state patients increased to such a point, however, that the Greater Baltimore Medical Center, Johns Hopkins and Sinai Hospitals had to stop accepting non-Maryland patients.

The latest U.S. District Court decision, if sustained by the Supreme Court, could, of course, change all this, and Judge Gesell seemed confident, not only that the U.S. District Attorney would appeal his decision but that the Supreme Court would be sympathetic to his decision. There had, he observed, been "an increasing indication in decisions of the Supreme Court of the United States that, as a secular matter, a woman's liberty and right of privacy extends to family, marriage and sex matters, and may well include the right to remove an unwanted child, at least in the early stages of pregnancy."

Whether the federal Congress and the Supreme Court would leave the question of abortion to whatever reasons seemed "satisfactory" to the "competent licensed practitioner of medicine" and his patient, however, is still under serious debate.

Most of the states that have liberalized their abortion laws are less lenient. In general, they approve abortion if the pregnancy would impair the physical or mental health of the woman, risk mental or physical defect in the child, or if the pregnancy resulted from rape or incest.

Nevertheless, Judge Gesell's decision has brought the controversy to the doors of the highest court, where it may finally be judged without the same political pressures that have tolerated the present unequal, dangerous and tragic tangle of state laws and back-room clinics.

How to End the Nigerian War

The situation now in the Nigerian war is grotesque. Biafra, reduced to an enclave of valor and suffering, is putting out ambiguous signals of compromise. Nigeria, gripped by a heady vindictiveness, insists on surrender instead. The Biafran signals come down to an indicated willingness to accept something less than full sovereignty if guarantees of security can be put into effect. This is a reasonable condition, given the massacres Biafrans have previously incurred at Nigerians' hands and given, too, the passions of their two-and-a-half-year war. Lagos has offered security guarantees, but even as it offers them it applies military pressure, tightens the food noose and demands that Biafra renounce sovereignty at once. These are unreasonable conditions. Biafra cannot be expected to return to the federal union other than by gradual means allowing it to preserve respect as well as security.

The immediate political question is how to bring Nigeria to the understanding that its own best chances for national union lie in relaxing the pressures on Biafra. The United States, which supplies the bulk of Biafran relief but no arms to either side, could help most by assuring continued relief, so as to remove from Nigeria's hawks the sustaining expectation that Biafra can be starved into submission. Washington could, for instance, publicly criticize such Nigerian acts as the destruction of yet another relief aircraft just the other day. Washington should also show more alarm and urgency about the failure of the International Committee of the Red Cross to arrange daylight relief flights to Biafra. That Biafra bears its own measure of blame for this failure is irrelevant. The central consideration should be to get more food into an area where thousands of humans are dying every week.

On Britain, however, falls the chief responsibility for bringing Nigeria to its senses. The British seem to have counted on Biafra being starved or shot into surrender. This has not happened, and Biafran fortitude makes it unlikely that it will happen. London should now recognize the bankruptcy of its previous policy. It should accept an obligation to urge accommodation upon Lagos.

The best way to pursue this policy is in league with the French, who still—despite De Gaulle's exit—support Biafra. Certainly the British should be as insistent about urging negotiations as they are about selling arms.

THE WASHINGTON POST.

Letters

Black English

I thought the article on "Black English" (Nov. 6) was informative and correct as far as it went, but that was not quite far enough.

The essential feature of "Black English" is not the transposition of, or lack of, standard grammatical forms, but rather, a completely different meaning that is given to certain "normal" words and expressions generally used by the majority of the white society.

Because of the historical and continual isolation of the black man from the white society, a separate culture and language form was enlarged upon and developed. This language form can be totally alien to that of the whites', and sometimes has a meaning that is diametrically opposed to the same white words and expressions.

For example: words such as dig, crazy, bread, stoned, old man and cream mean one thing in "regular English" and something quite different in "Black English." I assure you these words constitute part of a language form for the blacks and not a slang form. They are only considered slang by the whites.

It is also to be noted with interest that some levels of the white society, i.e., show people and a certain segment of today's youth, have adopted this "Black English" and thus many words and expressions with their origins in "Black English" have come into the mainstream of American English; i.e. "do your thing," "that's not my bag," "sock it to 'em," "way out" and "rock an' roll." This is one of the many examples of black culture contributing to Americana.

However, hallelujah for the aforementioned article. Any effort in this direction can only be commended and must have positive results, as it tries to show the white society some of the aspects of black culture and perhaps narrow the gulf of misunderstanding that obviously exists today.

The eminent professors are certainly to be praised for their noble efforts in starting to "tell it like it is."

FRANK VAN BRAKLE.

Paris.

The Decoded Bard

In the obituary of the eminent cryptologist Lt. Col. W.F. Friedman (IHT, Nov. 4), his merits are limited to his contributions to the war effort. Spectacular as these were, Col. Friedman's achievements, fortunately, were not restricted to his work for military intelligence.

After the war he devoted years of patient study to the observation of the activities of the "anti-Stratfordians," that is to those individuals and organizations who deny the authorship of the Shakespearian plays to the actor from Stratford. So far as the claims of these very numerous doubting Thomases are based on alleged messages, hidden in the form of cryptogrammic systems within the text of the First Folio, Col. Friedman, in his book "The Shakespearian Ciphers Examined" (Cambridge, 1957), has refuted them with his unique perspicacity. "No one," says H.N. Gibson in "The Shakespearian Claimants," "whose mind is not steeped in prejudice could put an atom of faith in any of the ciphers after Friedman's exposure." The "Baconians" et al., once so noisy and prolific in their publications, have been silenced since Mr. Friedman's examination. No mean feat, indeed.

OTTO REINER.

Scapegoat?

We are constantly reminded that Spiro Agnew has been made the scapegoat of self-righteous and self-pitying liberalism since the presidential election. Whatever offense that section of opinion which your paper presumes to represent may have taken from the vice-president's speeches, your constantly traducing him has become remarkably unconvincing, and even less funny. It can actually be downright irritating when it is done on the flimsiest of motives as in your Nov. 7 issues in the article by Maxine Cheshire.

I believe you might choose your articles with more discernment if you are to retain a reputation for enlightenment that reflects on many liberal views.

ALAIN DE SARRAN.

Tours, France.

In the Doghouse

In today's permissive society, there are a good many happenings that are, at best, pretty unpalatable to many of us. I am not, please note, thinking of the atrocious war in Vietnam, the secret war in Laos, the troubled (what a weak word!) Mideast—nor am I even thinking of the monotony of listening to a series of political speeches that say little, promise less and promote no action whatsoever.

No, indeed, I am thinking mostly about farcical and fantastical events such as the more than two years of freedom enjoyed by Cassius Clay since being convicted and sentenced; the continued hijacking of aircraft; illegal takeovers of buildings by students; the fuss over Judge Haynsworth (he's probably no worse and no better than 90 percent of our judicial personnel); Sen. Edward Kennedy's mostly unexplained night out; the Roman holiday of Judge Hoffman and Bobby Seale; and so on, *ad infinitum ab absurdo*.

It was left to the Herald Tribune, however, to make the crowning gaffe of all time—and which may well result in a worldwide movement of protest. I refer to People (IHT Nov. 6) and the paragraph on Arthur, the British television cat. It was there stated that he is brought each day from his kennel in a box...

Webster's states: Kennel (ken't), n. (ME kenel; OFr. kenil; LL. canile - L. canis, a dog), 1. a doghouse; 2. a place where dogs are bred or kept; 3. a pack of dogs."

Nowhere, take note, is there a mention of a cat or any other feline. In the name of all the cats of creation, I protest!

ELMER C. SWANSON.

Golfe-Juan, France.

Flag Gaffe

Foreign relations ahoy! The Yankee Clipper pictured in your Nov. 1-2 number [and below], as the Apollo-12 emblem, is a shock to anyone acquainted with seafaring tradition.

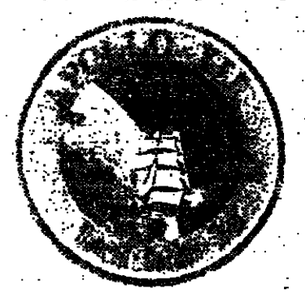

The clipper ship is shown with the United States flag on its foremast, which is wrong. A ship's national flag is flown at th on a flagmast or run up gaff.

If and when a flag is on the foremast, it is the the country where the ship port, as a courtesy.

Washington has carefully ed claiming any part of the for the United States. I see why Apollo-12 should any national territory o moon, not even the United in spite of the previous lan

TORE HYTT

Oslo.

International Opinion

Queenly Living

Nobody expects the queen to meet the expenses of her public duties out of her own pocket. Equally there is no obligation on the state to pay for the private pleasures of royalty. The royal family is one of the richest in the world. The queen's private fortune is enormous. If Prince Philip wants bravely to go on playing polo, despite the onset of middle age, there is ample cash in the kitty to pay for a pony or two, but this is a private pleasure. And should be paid for as such.

—From the Sun (London).

* * *

[There must be] adequate provision from public funds for the efficient running of the monarchy. But there is less to be said for such immunities as the queen's strictly private income enjoys, or is believed to enjoy, in respect of taxation.

It does no good to monarchy to give the impression that the sovereign's personal fortune has a built-in protection against bad government or the vicissitudes of the economy.

—From the Daily Telegraph (London).

UN Rejection of China

The General Assembly has once again rejected a motion to recognize the Peking regime as the legal holder of China's seat in the United Nations. Perhaps more important than all the nuances which may be read from the voting, and which indicated no strong movement in one direction or another, was the fact that, during the week-long debate which preceded the vote, the Soviet Union for the first time during such a discussion did not demand the floor. It was also noted that, in contrast to former years, the Soviet delegates did not march out of the hall when the representatives of Nationalist China defended their own position and attacked the terrorism which rules the Chinese mainland under Mao Tse-tung.

—From Neue Zuercher Zeitung (Zurich.)

* * *

The United States controls the UN General Assembly but more countries are supporting mainland China. The Peking regime has the legitimate right to be represented in the world body, and there is only one China, the People's Republic of China.

But new China does not care about the UN representation. If it is not represented, it does not hurt new China. The UN will be hurt for losing representation of a quarter of the world's population.

The UN's reputation is going down, new China's reputation is going up.

—From the New Evening Post (Hong Kong).

In the International Edition

Seventy-Five Years Ago

Nov. 13, 1894

PARIS—The question of disarmament may perhaps be settled some day, but that day is not yet near its dawn. Not that people are blind to the impossibility of keeping up indefinitely a state of armed peace which costs Europe, year in year out, the sum of five milliards of francs. But the difficulty is to find a way of putting an end to the present international situation without a violent crisis, that is to say, without a war.

Fifty Years Ago

Nov. 13, 1919

WASHINGTON—It was announced yesterday by the Bureau of Internal Revenue that a series of conferences will be held between bureau officials and manufacturers of certain alcoholic preparations to devise means to make unfit for consumption such of them that cannot be manufactured if found suitable for drinking. The enquiry will be directed to include barbers' supplies and perfumes, liquid medicinal compounds and flavoring extracts.

Boys carrying ... rules and dressed in cor... Levis stared in awe. The ... seemed alive with the ...tement that Leila generated. ... August she had announced ...the world over the radio of ...TWA Boing that the com...dos of the Popular Front ... the Liberation of Palestine ... hijacked a plane going to ...el and that they were ...ing it to an Arab country. ...For the benefit of the lone ...erican in the room, she told ...ething of her background ...d of her membership in a group that is often thought of as a terrorist organization.

"We were thrown out of our home in Palestine in 1948," she said. "I was only four years old then, and we lived in the town of Haifa. When the Jews came many people were killed, so we fled to Lebanon."

Her eyes were filled with bitterness and hurt. But, when asked where she had gone to school, her mood changed and she smiled with good-humored malice.

"I went to the American Girls' School in Tyre, then I studied at the American University of Beirut—a liberal American education!"

Some time after she left the American University and went to Kuwait to teach school, Leila and four of her teacher friends from Palestine joined the Popular Front.

One of the girls, Shaela Gazaleh, was killed on a commando raid on Nablus, a large town on the West Bank of the Jordan River. A second friend, Aminah Dahbour, is being tried in Switzerland for the machine-gun attack on an Israeli airliner in Zurich last February.

Another girl, Rachida, sneaked back into Israel, and placed a bomb in the British Consulate in Jerusalem. The last of the group of five friends has not surfaced so far. She is a fragile, small blonde, known only by the code name of "Suead." Leila and Suead express their philosophy in the same terms.

A week or so before Leila revisited the American University in Beirut, Suead was reluctantly showing a foreigner the inner structure of the Popular Front organization in a large refugee camp outside of Amman, Jordan.

The Popular Front has a training ground for Lion Cubs (the Palestinian Revolutionaries' version of the Boy Scouts) in the camp where they learn to handle various types of weapons and are taught the Popular Front philosophy.

There is also a meeting room where the walls are covered with posters of world revolutionary heroes like Mao Tse-tung and Che Guevara, and the usual revolutionary literature from Marx to Regis Debray in Arabic overflows the bookshelves.

While watching little boys take apart a machine gun, Suead was describing the basic philosophy of the Popular Front.

Class Struggle

Its dogmas are rooted in the concept of a world class struggle and the necessity to fight imperialism wherever it exists. The Popular Front not only feels that Western economic interests are exploiting the natural resources of the Arab world, but that most of the existing Arab governments are cliques of vested interests, imposed by the West, that exploit the mass of the population for the enrichment of the very few.

According to Salah Hadin al-Kassan, one of the leaders of the Popular Front, Israel is in the vanguard of imperialism, not only because of its territorial conquests in the 1967 war, but because it is believed to be the fighting arm of the United States in the Middle East. It is also believed by the Popular Front that Israel will protect the U.S.-dominated oil companies' interests in this area by force of arms.

When Leila was asked how the cause of Palestinian liberation, or even popular world revolution could be served by hijacking and blowing up an American airliner, she replied:

"You don't understand, but this is a symbolic action. We hijacked the El Al plane [an earlier action of the Popular Front] because it carried arms and equipment that helped Israel militarily, and we hijacked the TWA airliner because it brought visitors and tourists to our enemies who are occupying our land by force of arms. We did this just three days after you gave Phantom jets to Israel to fight us. The people and countries who act as our enemies must learn that we will fight against these unjust actions."

United Press International.

2 Are Facing Trial as Spies In Rhodesia

Journalist and Lawyer Go Before Magistrate

SALISBURY, Nov. 12 (Reuters).—Two Europeans—a lawyer and a journalist—were committed for High Court trial here today on charges under Rhodesia's Official Secrets Act and emergency-powers counterespionage regulations.

The two are John Roger Nicholson, 37-year-old financial editor of the Salisbury Rhodesia Herald, and Arthur Trevor Gallaher, a local attorney.

No evidence was given as the two men appeared separately in Salisbury Magistrates Court for a preliminary examination on the charges.

A list of charges was read at the brief hearings, and the two were then immediately taken back into detention. Bail was refused on order of the attorney general.

Trial Next Month

The two men are expected to come to trial next month.

Scottish-born Mr. Nicholson, who also acts as correspondent in Rhodesia of the London Times, and Mr. Gallaher, a New Zealander by birth, were both charged under several sections of the Secrets Act and emergency regulations.

They made no pleas and reserved their defense.

The names of the two men had previously been withheld under Rhodesian law.

Mr. Nicholson, who was a member of the Southern Rhodesian Parliament from 1962 to 1965, was arrested by police while working in his Salisbury office two weeks ago.

Mr. Gallaher had been held in a police camp at Goromonzi, about 16 miles from Salisbury, for about a month.

Said to Seek Control of Mental Group

Scientologists Win a Round in British Court

By Alvin Shuster

LONDON, Nov. 12 (NYT).—The Scientology organization won the first round today in its battle to take over Britain's National Association for Mental Health, one of the most respected voluntary bodies in the country.

Acting at the request of the Scientologists, a high court judge granted an emergency order preventing the start of the association's annual meeting today.

The Scientologists, who call their group an "applied religious philosophy," argued that the association was illegally trying to prevent them from offering candidates for office. The judge was told that seven Scientologists had received letters requesting their resignation from the association.

'A Take-over Bid'

"This is a direct take-over bid," said a spokesman for the association. "We have known for some time that Scientology was trying to get a voting majority. Their aims and ours are incompatible."

Control of the association by Scientologists, who are opposed to present professional methods of psychiatry, would drastically alter the association's work. Scientology's practices seem to be related to psychoanalysis, but do not require medical or other professional training.

The association, which will appeal today's decision, at another hearing next week, strives to disseminate information about mental illness and improve treatment facilities. Its vice-presidents include Dr. Michael Ramsey, the Archbishop of Canterbury, and Dr. Immanuel Jakobovits, the Chief Rabbi of Britain. It receives an annual government grant of $24,000.

Scientology, which has been denounced by a government spokesman here as "socially harmful," was founded in the United States by L. Ron Hubbard, who in 1950 published a best-seller called "Dianetics: The Modern Science of Mental Health." Two years later he shifted to Scientology, described in one of its own publications as "the largest mental health organization in the world."

Because the world headquarters of Scientology are located in East Grinstead, Sussex, near London, the group has created particular concern in this country. Last year, the government turned back groups of Scientologists heading for Britain for a meeting. The Ministry of Health found Scientology's practices "a potential menace to the personality and well-being of those so deluded as to become its followers."

David Gaiman, the Scientologists' press spokesman who hopes to run for chairman of the national association, said today that "my sole interest is reforms in the mental illness practices." He was supported by more than 200 Scientologists who arrived by bus to demonstrate outside the hall where the association had been scheduled to meet. They carried such banners as "people are precious" and "mental patients have rights, too."

Marcos Wins Philippine Vote, Opponent Alleges Chicanery

By Tillman Durdin

MANILA, Nov. 12 (NYT).—An accumulation of problems faced President Ferdinand Marcos today as he became the first Philippine chief executive to win a second four-year term in yesterday's elections.

Not the least of these problems was a refusal of his opponent in the presidential race, Sen. Sergio Osmena, to concede defeat and the prospect that the senator and leaders of his Liberal party may contest the election on the grounds that fraud, violence, vote-buying and other improprieties directed by Mr. Marcos's Nationalist party reduced the Liberal vote.

One of the first issues Mr. Marcos will tackle will be the Philippines' claim to Sabah, now ruled as a part of Malaysia. Another of his aims is said to be to orient the Philippines less toward the United States and closer to Asian countries.

Sen. Osmena said tonight he has not yet decided whether to formally protest election results based on incomplete and unofficial returns available today. He said this would depend on investigations of the scope of alleged irregularities.

Alleges Widespread Chicanery

But he alleged widespread chicanery and cited returns showing he received not a single vote or only a few votes in districts where he believed he was popular.

But Mr. Marcos made it clear he considered himself confirmed in office and began to plan his next four years. Protests of election results often occur after Philippine elections, and the complaints of Sen. Osmena and his supporters will probably be dropped eventually.

Sen. Osmena and his party leaders had a complaint today not only against the Nationalists but on the use by a private group for the first time in the Philippines of a computerized system of projecting results based on early returns from a few typical precincts. The system was used by a pool of radio and television stations and newspapers.

The Liberals maintained the system could be extrapolating incorrect showings in the selected precincts and that projections of a landslide victory for Mr. Marcos were leading people to believe these unofficial private forecasts were definite and official.

The projections late tonight showed Mr. Marcos had 4,534,352 votes to 2,662,251 for Sen. Osmena.

Meanwhile, another vote tally by Operation Quick Count, an organization of volunteers who are sending in results from ballot collection centers all over the country, was proving slower than expected. By late tonight the OQC had reported 1,880,824 votes for the president and 1,210,114 for the senator.

No Voting Machines

Final official returns of balloting in the Philippines, where there are no voting machines and few mechanical devices of any kind for use in elections, usually takes several weeks.

Kenneth Murchison Dies; Wealthy Texan

DALLAS, Nov. 12 (NYT).—Kenneth Murchison, 68, an insurance executive and a brother of the late Clinton W. Murchison, one of the world's wealthiest men, died last Wednesday.

Mr. Murchison was the founder of Kenneth Murchison & Co., an insurance partnership here.

FAA Issues Rules to Reduce Jet Noise at Airports by Half

WASHINGTON, Nov. 12 (AP).—The Federal Aviation Administration announced today a regulation designed to cut in half the noise from jet planes arriving at or leaving airports.

The regulation, effective on Dec. 1, applies only to the Boeing-747 and other airbus and jumbo jet types not yet in service. But an FAA spokesman said similar regulations are being considered for current jet planes later next year.

The industry has labeled the proposed new regulation contrary to law "in that it is not economically reasonable and technologically practicable."

Secretary of Transportation John A. Volpe said the new regulation for new airliner types "will result in an approximate halving of the noise around airports."

Initially only the 747, due to begin airline operation early next year, and the Lockheed L-1011 and Douglas DC-10, coming along a year or two later, are affected by the new rule.

However, Oscar Bakke, FAA associate administrator for plans, said a similar rule for current jet planes probably will be proposed in the last half of 1970, and might go into effect six months or more later.

The rule for current aircraft might require engine-hushing modifications that would cost $685,000 to qualify each Douglas DC-8, or $1.2 million for each Boeing-707.

The new rule is based on a measurement of sound on a logarithmic scale, called effective perceived noise decibels, or EPNDB. It establishes a maximum noise level on takeoff or landing ranging from 93 to 108 EPNDB, depending on the type and size of aircraft.

Current large jets operate in the range of 110 to 120 EPNDB on takeoff and landing. A reduction of ten EPNDB means cutting engine noise by about one-half.

News Analysis

...pain's Military Still Key Element Despite Technocrat Rise

By Loren Jenkins

ADRID, Nov. 12 (WP). ...eneralissimo Francisco ...nco's emphasis on new-wave ...nocrats in his recently ...huffled cabinet has obscured ...at is still a key element in his ...thoritarian state—the role of ...military.

...or while the 76-year-old ...nco has entrusted his last ...inet to the aggressive, Eu...an-oriented professionals ... are either members of or ...d with the Catholic lay ...er Opus Dei, he has done ...ning to modify the military's ...stitutional role as the ultimate arbiters of Gen. Franco's one-party system.

Gen. Franco's last constitution, the 1966 "organic law of state," clearly empowers the military "to guarantee the defense of the institutional system." Subsequent statements by the Caudillo and his generals have made clear this defense is to be internal as well as external.

The riddle of Spain's future in these twilight years of Gen. Franco's rule thus remains the military, despite all the dictator's recent moves to pave the way for an orderly and institutionalized succession.

Throughout Spain's turbulent history, the military has been one of the key elements in political protest and change. This century has been no different: Two generals—Primo de Rivera in 1923 and Franco in 1936—have led coups that placed the fate of the nation in the hands of the military. Few observers believe the future will be any different if the order and civil peace that Gen. Franco's system has imposed are threatened in any way.

"There is no doubt about it—the naming of Prince Juan Carlos to be king on Franco's retirement and the appointment of a more homogeneous and modern-looking cabinet will mean little after Franco leaves if the military does not like their rule," a high government official said recently.

At the moment there appears to be no danger of any military interference in the evolution of the post-Franco era.

The strongest military man in the cabinet remains the vice-president, Adm. Luis Carrero Blanco, 66. Gen. Franco's most trusted adviser and the man generally believed to be in line to be premier when the chief of state decides to name one.

Loyal General

Below these men, the power lies with the nation's less than two dozen lieutenant generals on active duty, especially those in command of the country's nine military regions. All are from the civil-war period and rigidly support Gen. Franco and his view of Spain. Though all have carefully eschewed expressing any political views, it is generally accepted that, with few personal exceptions, they are in accord with their mentor's efforts to modernize his regime, even at the cost of slighting its early Falangist party support in favor of the less doctrinaire Opus Dei technocrats.

The main exceptions, according to analysts, are Madrid's military governor, Gen. Carlos Inesta Cano, and Barcelona's military governor, Perez Viniesta. These two old-guard militarists are understood to be wary of some of the technocrats lest they compromise the Francoist order. Neither, however, is considered a threat; they have no real personal followings.

In fact, one of the ironies of the regime is that, though it was founded as a military dictatorship, Gen. Franco has very carefully sought to keep his military establishment apolitical, allowing no general to develop much personal popularity. Only 75-year-old Capt. Gen. Agustin Munoz Grandes has acquired any great personal following. But he is gravely ill and clearly no longer in the political picture.

Greece Cited

As with many armies—and the Greek example is often mentioned in Spain—the future is not expected to be determined by the present leadership but by the younger generation, the commandants and colonels. This group, the middle level of the nation's 15,000 officers, remains an enigma in Spain.

"The colonels of today will be the generals of tomorrow," one Western diplomat points out. "And there you could have change if many of these do not see eye-to-eye with the politicians and technocrats whom Franco has chosen to run the country. These officers would never challenge Franco, but when he is no longer around they may act to alter the situation, relying on the traditional distinction always made by the Spanish military between military sedition and national salvation."

Met Negotiations Recess Without Making Progress

NEW YORK, Nov. 12 (NYT).—Negotiations between the Metropolitan Opera Association and its orchestra recessed late yesterday without any substantial progress toward an agreement.

Spokesmen for both sides, who had been hopeful on Monday of steps toward a settlement this week, appeared pessimistic after that progress failed to materialize.

David L. Cole, Mayor John V. Lindsay's mediator in the dispute, met with negotiators for both sides during an afternoon session at the Roosevelt Hotel. He later said that they were still apart on wages and the question of back pay for the period that the Metropolitan has been closed.

There has been no strike by the performers, but the management of the Metropolitan decided not to proceed with rehearsals or with the opening of the season until contract agreements were reached with all involved unions.

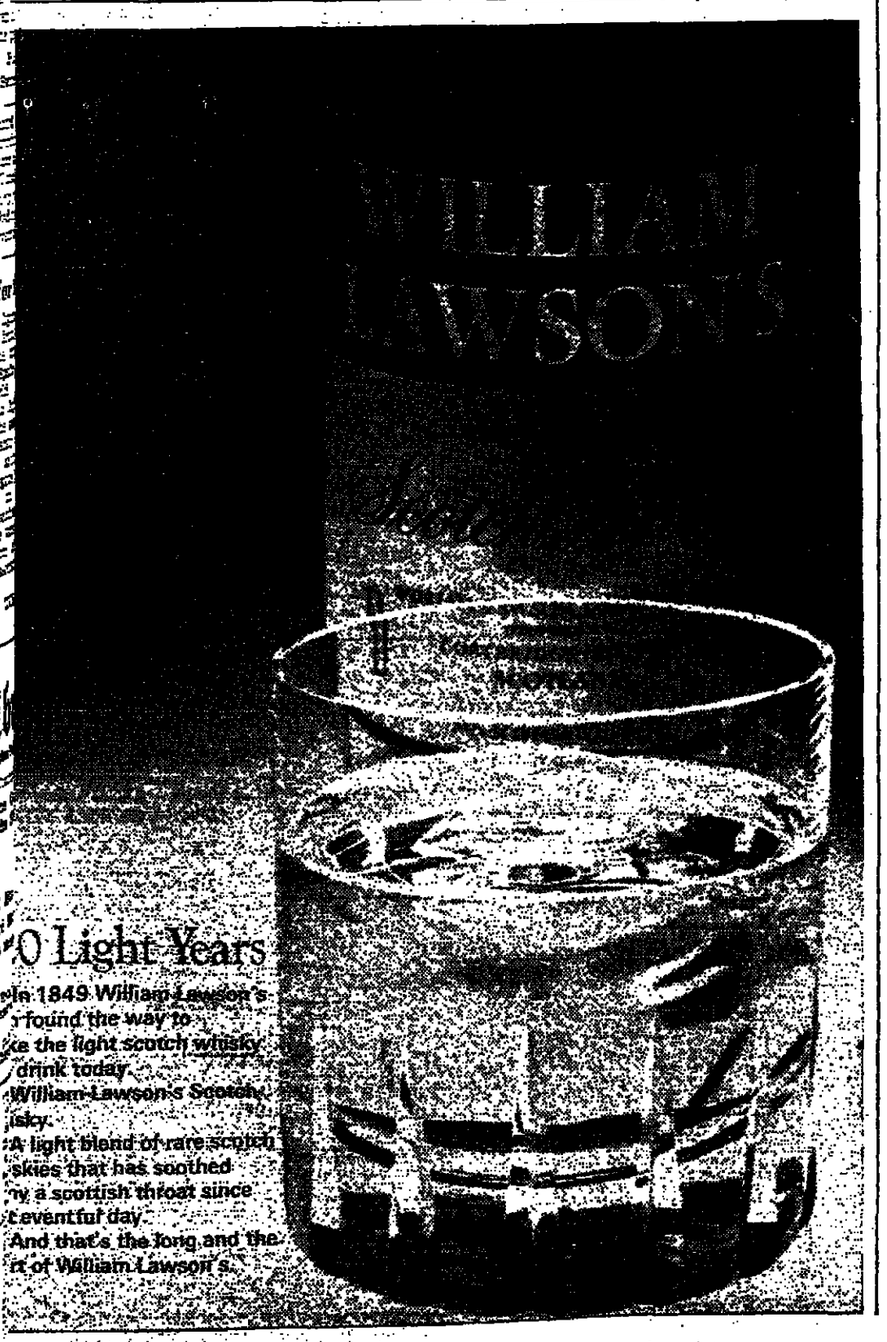

Mr. Cole said that no date had been set for a resumption of bargaining of talks, but that he expected to call the parties together again soon.

Gavin's Private Talks In Moscow End

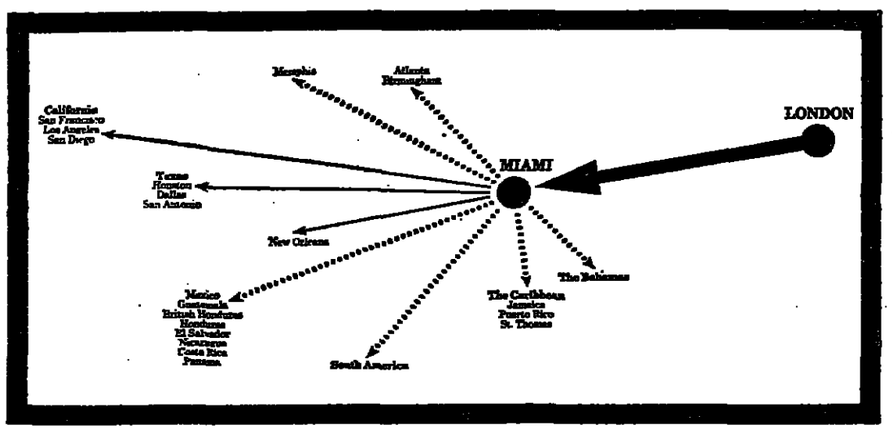

MOSCOW, Nov. 12 (AP).—Retired Gen. James M. Gavin, former ambassador to France and now chairman of the board of the Arthur D. Little consulting firm, has completed four days of talks with Soviet officials on economics and technology, Tass news agency reported today.

Gen. Gavin arrived unannounced in Moscow Saturday and has met with Deputy Premier Nikolai Baibakov, chairman of the State Economic Planning Commission, and with Dzerman Gvishiani, deputy chairman of the State Committee on Science and Technology. Tass gave no details of the talks.

The U.S. Embassy said Gen. Gavin was on a private visit and had not been in touch with U.S. diplomats.

National Airlines. The only daily non-stop jets between London and Miami.

On National, you fly the warm way to the new world. Because you fly to Miami. And flying to Miami means you avoid the chills and crowds and congestion of cold New York.

Fly to Miami and combine a few days in the sun with a trip to other stateside cities, too. Because National can take you to Los Angeles. San Francisco. Las Vegas. Houston. New Orleans. All over the rest of Florida. Etc., etc., etc.

National Airlines says "You're gonna have a great flight". Because our daily non-stops have opulent food. Magnificent drinks. Stereo. Adult games. And the only in-flight, wide-screen movies between Miami and London. We don't call it the "Sun King Service" for nothing.

We leave London at 10:40AM. And arrive in Miami at 2:10PM. So when you're going to the new world, go with us. You'll be going to Miami. And from there, if you want, we'll take you to etc., etc., etc. And we hope you'll return to the old world with us. The warm way.

Let your travel agent help you travel, or call National Airlines at 01-629 8272.

REAL ESTATE INVESTMENT IN THE U.S.
A New Concept
A well-established real estate principal, syndicater and manager (staff of 200 at present managing over $100,000,000) is studying the feasibility of including European persons or institutions in his syndicate's limited liability partnerships, investing in prime income producing properties in the U.S. The return on these investments is better than twenty percent per annum in cash and mortgage amortization, shielded from tax in the U.S. This does not include any factor for appreciation in the property which is likely to be substantial.
Minimum investment units are $50,000. For details please contact: Box D 1,533, Herald Tribune, Paris.

A U.S. Tribute to Schiaparelli

By Hebe Dorsey

PARIS, Nov. 12.—Elsa Schiaparelli may be the only fashion designer in the world for whom Alberto Giacometti ever made a button.

"A very pretty button it was, too," Madame Schiaparelli said, "with a bronze silhouette. I asked him 'Can I reproduce it?'—'Of course,' he said. Then I found out about the price. Impossible, it would have been ten times the price of the dress."

Few people know Madame Schiaparelli nowadays and even fewer give her credit for what she has meant in the world of fashion. For most young girls, she's just a name on a $1.75 pair of stockings. But the cognoscenti recall that she was the first couturier to open a boutique below her fashion house on Place Vendôme back in 1935. In the early 50s, she was the first to figure out the licensee formula, as a business outlet for talent.

An adventurous, outgoing designer with a mad sense of color (she invented Shocking Pink), she was really quite wild well ahead of the times.

She designed her own fabrics with surrealistic motifs such as newspaper prints, lobsters or radishes. She launched the shoulder bag during World War II because it was the only convenient bag to wear while riding a bicycle. She was also the first designer to put zippers on dresses, which was, in terms of fashion technique, a revolution of sorts.

Because of all this, the Philadelphia Museum of Art is honoring Madame Schiaparelli early next month by presenting a retrospective of her fashion creations. This will be a forerunner of a room dedicated to Madame Schiaparelli, which will be completed within three years, through the efforts of the Philadelphia Fashion Group.

Digging in her attic, Madame Schiaparelli has come up with some 40 models that she's giving to the museum. A great many look remarkably like today. There are maxi-coats, patchwork dresses and embroidered tunics that could go with any of the currently fashionable pants suits.

Marrying the world of fashion and finance, the First Pennsylvania Bank will also salute Madame Schiaparelli during her trip to Philadelphia with a showing of her clothes at the opening of their branch on Ritterhouse Square. At that time, she will also be presented with the keys of the city by the mayor of Philadelphia.

A contemporary 70, Madame Schiaparelli lives in a quiet *hôtel particulier*, two blocks from the Champs-Elysées amid an arty clutter of silver boxes. Roman statuettes and books that range all the way from "The Love Machine" to "Ulysses." She also has three lamps designed by Giacometti plus a couple of gold sculptures of his on top of her living room door.

Although she always wears black in town, she loves color at home and favors handsome silk kimonos with three strands of big baroque pearls.

Sitting on a fur-covered settee by the fire, she was busy all day yesterday working out the last details of her trip with Libby Haynes Heyman, director of the Philadelphia Fashion Group. "I feel very honored to be the first Paris designer to be asked by the museum," she said.

She will be in good company. The museum already has a celebrated costume wing—the *pièce de résistance* is Princess Grace of Monaco's wedding gown.

* * *

The French ready-to-wear season is in full swing: about 50,000 visitors will have stopped by the 18th international salon, at the Porte de Versailles, by the time it closes tomorrow. The salon covers 26,000 square meters and displays collections of 450 manufacturers.

Always a key market for foreign buyers, the French ready-to-wear is now even more competitive because of the recent franc devaluation.

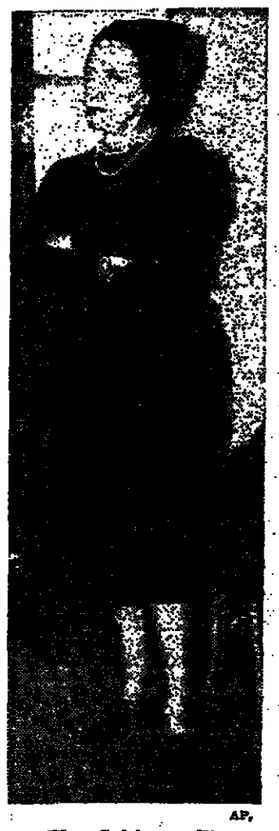

In a parallel effort, French boutiques are organized at Les Halles while the deluxe French ready-to-wear is grouped at the Hilton Hotel.

* * *

Designer Antonio del Castillo is back on the fashion scene. Next February he will open a new couture house in what used to be the Galerie Charpentier on the Faubourg Saint-Honoré.

His new house will be more like a three-story-high specialties shop with two floors devoted to boutique sportswear, knits and accessories. But Castillo, who has a great hand with evening wear, will still have an after-five, custom-made department.

Later in the year, he will also open on the Avenue Victor-Hugo as well as in Cannes and Monte Carlo.

Theater in London

Hospital Life: Point, Counterpoi

By Thomas Quinn Curtiss

LONDON, Nov. 12.—The National Theatre is providing an engrossing evening with a vast and ingenious production of "The National Health," a new work by Peter Nichols.

The show unites a realistic inspection of life in the hospital ward of a state-subsidized clinic with episodes from a slushy television serial which, in contrast, ridicules the popular, romantic view of medicine.

Actually two plays in one (the subtitle is "Nurse Norton's Affair"), the production is cast in the form of a revue. The central play sets before us the inmates of a public sick ward, together with their attendants and physicians. There is a ferocious Tory dying of cancer, an elderly doctor who has suffered a stroke, an old gardener down with a variety of complaints. Then, there is a youngish fellow with heart trouble, an alcoholic under temporary observation, a schoolmaster suffering from nervous disorders and a reckless hippie motorcyclist. This latter, after having been repaired and dismissed, returns—forever—after a second accident.

From these cases and from the restless traffic of the general hospital background Mr. Nichols has extracted a drama that is quick with action, suspense, reality, human interest and a bitter humor. There is comedy of the bed-pan stripe and that of a higher, darker order as a sassy orderly, acting as a matter-of-fact commentator, discloses the secrets of the operation theater and the details of death. Though not for the ultra-squeamish, this play has a sane, stimulating intelligence guiding the proceedings and skirting a descent into the harrowing.

Charles Kay and Robert Lang in "The National Health."

The patients, the doctors, the nurses and even the visitors—such as the do-gooder old maid who wanders the wards distributing uplift tracts and the jovial chaplain—are sharply sketched and the granite institutional attitude that shadows all is imposingly drawn.

The ironically inserted passages from a TV soap-opera about a dour old Scot surgeon who is reluctant to have his doctor son marry a colored nurse have a tasty bite in their mockery of the maudlin with swelling, symphonic music rising to aid the air-wave dramatist when his writing falls off.

The production of M Blakemore serves Mr. Ni hospital spectacle su bringing into play various techniques and retai throughout a sense of in and excitement.

Mr. Nichols's earlier pla Day in the Death of Joe had long runs in Londo New York and is about filmed.

The entire company is rably suited to its duties. Dale's impudent orderly s standing, and there are n rable characterizations by C James, Patrick Carter, I Lang, Bernard Gallagher, Nightingale, Harry L Charles Kay and Brian as the patients. All the ot including the bits of the ing Indian student and female doctor so overw that she is forever droppi reports—are brilliantly tak

Here is an evening of br and absorbing theater.

* * *

Rodney Ackland's dram tion of Hugh Walpole's "The Old Ladies" has bee restingly revived at the minster Theatre. Flora R now takes over the role Evans created in the or production and gives an mensely impressive perfor as the sinister widow who piece of glittering amber f ens her fellow boarder—a thetic, bird-like spinste death. Joyce Carey make helpless victim a creatu enormous and heart-bre appeal. It is a gratifyin perience to see such spl acting.

* * *

There always seems t scant information availabl matters that suddenly int one's curiosity. The play a Fortune Theatre—"My L Boy . . . My Big Girl"- written by Naomi and I Robison. It is based on st by Carl Ewald. Who Ewald is is not revealed. the scene of the play is penhagen, one supposes h a Dane. And, as there are lings of sound character st in it, one imagines he is a b writer than his adapters.

They have given a prom plot the banal flashback folding of the movie sc beginning at the end a literary veteran of 85 looks over his family life, his pol beginnings and end.

The material is the stuff much better play than we h but it is enlivened by the formances of Eric Porter as fine spirit dimmed with passing of time and by tha Jean Anderson as his stiff-n ed maiden aunt.

Shanda Lear (It Could Have Been 'Gonda')

By Pamela Taylor

GENEVA, Nov. 12.—Among the many Americans who have chosen Europe as their permanent home is a young lady with the unlikely name of Shanda Lear.

When she was born in Los Angeles 25 years ago, she was named as a joke by her grandfather, the famous vaudeville comedian of the 30s, Ole Olsen of Olsen & Johnson. She was also born with a silver spoon in her mouth, thanks to her father, millionaire Bill Lear of Lear Jet, Inc.

Shanda Lear has surprised everyone by gracefully accepting Olsen's tag for her (among others he had suggested were Gonda and Lava. But Mr. Lear chose Shanda). She has, in fact, turned their little joke to her own advantage in trying to make a name for herself in the field of mime and comedy songs.

"No Hollywood agent could have found a more appropriate name," she is fond of saying.

She hasn't, however, found it so easy to accept her father's name and all that it stands for. Smarting from remarks such as "rich American kid" and "nouveau riche," Shanda seems to be trying to avoid any reference to the Lear side of the family.

But, commenting on her father's dream of building steam cars as a means of eliminating air pollution (IHT, Nov. 12), she said, "Well he's a gambler... he's always gambled everything. And when he finds something's not working, he gives up." (Her father, inventor of the Lear Jet, had spent $5.5 million on this project before he gave it up.)

A New Name

The name problem was partially solved when, in 1967, she married Italian journalist Gian Carlo Bertelli. In private life, she now passes quite happily as "Madame Bertelli". But in her professional life, she falls back on the name her family gave her.

In spite of a promising beginning, Shanda considers singing an amusing pastime and not a serious career. Her approach to it is typified in her handling of the Italian version of the song Esther and Abi Ofarim made famous, "Cinderella-Rockafella."

The record was submitted to Italian-American supporters of Governor Rockefeller in the 1968 presidential campaign as a jab at her father, who was supporting Nixon. The record caught on as a campaign song and Shanda made the news.

Nevertheless, with seven single releases to her name, several appearances on Swiss and Italian television, and her first LP coming out next year, Shanda thinks that her most important role is that of wife and homemaker.

Her lovely apartment in Champel, one of Geneva's nicest residential areas, is furnished, according to Bertelli, "all' Italiana" and serves as a backdrop for a very good collection of naïve paintings.

Cooking Experiments

According to Gian Carlo, Shanda's main contribution to the domestic scene consists of frightening him to death with cooking experiments whenever they have guests for dinner. "Why is it only when we have guests?" he laments.

The Bertellis are currently engaged in a joint television project based on the life and works of Ole Olsen. The scenario, written by Mr. Bertelli, was prompted by an inherited collection of Olsen's works which included the original script of "Hellzapoppin", an autobiography Ole Olsen was writing when he died in 1960, and an archive of 7,000 jokes and gags.

Shanda is to play herself in the seven-hour comedy show, entitled "Mio Nonno Hellzapoppin" (My Grandfather Hellzapoppin) which has already been accepted by Italian television.

Shanda Lear, one of her paintings.

EEC, Germans Adopt Final Farm Price Pact

BRUSSELS, Nov. 12 (AP).—European Economic Community ministers of finance and agriculture agreed early today to allow West Germany to pay 1.7 billion marks ($464.4 million) each year for four years to its farmers to compensate for their loss of income resulting from the mark revaluation.

German Agriculture Minister Josef Ertl insisted on this aid, threatening that otherwise Germany would not be very cooperative in financing the EEC farm policy.

The ministers last month agreed in principle on compensating German farmers but had not worked out the details.

A Common Market Commission proposal ran into several difficulties, with Mr. Ertl saying his farmers would not accept a scaled down aid package, as the commission had proposed.

Germans Win

The ministers early today finally gave in to Germany's wishes. The community's farm fund will contribute $90 million in 1971 and $60 million in 1972. Pending savings by the farm fund from the French franc devaluation, the community may contribute another $20 million in 1973.

Meanwhile the border taxes the German government levied to protect farmers from cheap imports will be continued in all probability until Jan. 1, 1970, to enable the German Bundestag to pass the bill providing for direct subsidies to German farmers.

As the community's food prices are fixed in Units of Account (each equal to $1), German food prices would have dropped immediately by the amount of the revaluation, 9.29 percent, without protection.

In the meantime, the EEC executive commission will work out the character of subsidies Germany may pay to its farmers, which the ministers agreed should not be linked to prices, individual products, or amounts produced, but rather to the size of farms, farmers' income, and sales.

Schiller View

German Economics Minister Karl Schiller said at the close of the meeting that he was surprised that "a country which had conducted successfully a policy of economic stability had to fight so long to convince its partners" of the necessity to cooperate in compensating its farmers.

After Germany obtained assurance of compensations for its farmers, Mr. Ertl went along with a five-year $220 million plan to improve Italy's orange production, which provides for measures to encourage growers to concentrate on better-quality oranges, modernize production and improve packing.

The Common Market farm fund will pay 50 percent of costs incurred, with the other 50 percent being paid by Italy.

Farm Group Finds Accord Unsatisfactory

BONN, Nov. 12 (NYT).—The West German Farmers Association says it will soon ask its members to vote on "combative measures against continued discrimination" by the federal government and the European Economic Community.

Baron Otto von Feury, president of the association, said that farmers would be called upon in the vote to decide on buyers' strikes and protest rallies against the Common Market's formula for offsetting West German agriculture's income losses from revaluation.

To make up for the estimated annual losses of $425 million from last month's revaluation of the mark, the EEC proposed after much wrangling a combined system of national and Common Market subsidies with the EEC supplying up to $180 million through 1973.

The association represents about three million farmers and farm employees, or about 5 percent of the total farm population.

The Bonn government was authorized to pay out $348 million annually in subsidies on top of the Common Market's.

Mr. von Feury called these proposed measures "intolerable manipulations" and demanded instead an indefinite protectionist levy on farm imports and suspension of the unit of account system under which minimum farm prices are fixed throughout the six-nation community.

He recalled that France was granted a two-year border levy on exports, following last summer's devaluation of the franc.

Japan Ousts Britain From No. 2 Spot in Lloyd's Shipping Totals

LONDON, Nov. 12 (Reuters).—Japan has succeeded Britain as owner of the world's second biggest merchant fleet, according to Lloyd's Register of Shipping figures published here today.

Japan has shown an increase in gross tonnage of more than 7 million tons in two years and now has a 23.99 million-ton share of the world total, which is put at 211.66 million.

Liberia stays in top place with a registered 29.22 million tons double its 1964 figure, while Britain has dropped to third place with 23.84 million tons.

The register attributes the increased tonnages of many countries' fleets to the bigger ships now going into service.

Norway, with 19.68 million tons, is fourth, and the 19.55 million-ton fleet of the United States—one of the only two principal fleets to show a decline—is relegated to fifth place, but still above the Soviet Union's 13.71 million tons.

The world total of oil tankers has gone up by more than 8 million tons during the past year, the register said, representing 36.6 percent of all steam and motor ships compared with 35.6 percent last year and 35.3 percent in 1967.

Liberia, Japan and Britain have made the largest additions to their oil tanker fleets, and in this section the United Kingdom retained second position with Liberia in the top slot.

Gold Price Continues Drop; Down 60 Cents in London

LONDON, Nov. 12 (UPI).—The price of gold slumped heavily again today to hit one of its lowest levels since the "free" market in the metal was launched 18 months ago.

Speculators unloaded more of their holdings and found industrial buyers unwilling to take in new stocks.

This chopped 60 cents an ounce from yesterday's price, to $37.75 an ounce at this afternoon's fixing. Later trading showed an improvement to $37.90 an ounce.

Dealers said no really large quantities of gold changed hands and while buyers held aloof, big price swings seemed inevitable in the thin market.

There was no change in the broad gold market pattern of recent weeks. High interest rates have attracted some hoarders to sell gold and invest their funds now that the alarm bells had stopped ringing in international currency markets.

The decision to increase the world's reserve assets through the International Monetary Fund's Special Drawing Rights has coincided with the new steadier conditions in money markets and the improvement in Britain's balance of payments.

There has been a steady decline in the gold price recently, which was arrested briefly yesterday when the price rose by 23 cents an ounce to $38.35 at the afternoon fixing. On Oct. 27, the effective date of the German revaluation, the price was $40.15 an ounce.

Egypt Announces Discovery of Oil

CAIRO, Nov. 12 (AP).—Egypt has discovered a new oil field in the Western Desert which is expected to double the country's annual output in five years, Petroleum Minister Aziz Sidky announced today.

The discovery lies within the concession of the Pan American Oil Co., Mr. Sidky said preliminary tests showed that one well tested at 2,000 barrels of crude daily, while another gave 49 million cubic feet of natural gas daily.

France Reduced Its Trade Deficit 40% Last Month

PARIS, Nov. 13.—France lopped 40 percent off its monthly trade deficit in October, the Finance Ministry reported today, reducing it to $174 million from the $285 million deficit in September.

Provisional statistics not adjusted for seasonal variations show that exports continued to respond to the government recovery program—aimed at cutting domestic consumption and encouraging exports. Sales abroad last month rose 25.2 percent over September levels to $1.41 billion. In September, exports had risen 38 percent.

Imports also continued to climb, although at a less rapid rate. Last month they were up 12.3 percent at $1.59 billion. In September, imports shot ahead by 40 percent over the preceding month.

Because of the way in which customs statistics are calculated—certain items such as insurance being included in import prices but not in exports—France considers its foreign trade in balance when imports are covered 93 percent by exports. October's coverage stood at 87 percent, up sharply from September's 80 percent coverage, which was the poorest showing so far this year.

U.S. Airlines Merger Seen First of Many

Northwest to Acquire Debt-Ridden Northeast

By John Abele

NEW YORK, Nov. 12 (NYT).—Northwest Airlines, one of the nation's most profitable airlines, and Northeast Airlines, one of the least profitable, have agreed to merge.

An agreement in principle was announced yesterday by Donald W. Nyrop, president of Northwest, and George B. Storer, chairman of Northeast. Mr. Storer also is chairman of Storer Broadcasting Co., which owns 86 percent of Northeast.

The proposed merger is subject to a number of conditions, including approval by the Civil Aeronautics Board, as well as company stockholders.

If completed, it would be the first step in what airline industry observers expect to become a series of mergers that would combine other major airlines.

Industry Squeeze

The mergers are expected to ease the growing profit and financing problems that have developed from increased competition on the nation's air routes, higher operating costs and the expense of purchasing new types of jet aircraft.

The merger of Northeast with Northwest presumably would inject new capital and management strength into Northeast. It also would allow the two carriers to switch aircraft to meet seasonal traffic flows.

The terms of the merger indicated the extent of Northeast's financial problems. It has lost money in 13 of the last 14 years.

The terms provide for the exchange of one share of Northwest common stock for each five shares of Northeast common stock—an exchange equal to about $47 million.

Northeast also has about $44 million of long-term debt, which has inhibited its ability to finance equipment purchases.

Northwest was the nation's most profitable airline last year, with net income of $50 million. In the first nine months of this year, it had net income of $40 million on revenues of $347.7 million.

Northeast lost $8.7 million on revenues of $95.9 million in the first nine months of 1969.

Northeast's most important routes are those linking major East Coast cities, such as New York, Boston and Philadelphia, with Florida. Traffic, however, is concentrated in the winter and is subject to vigorous competition from Eastern and National.

Northwest's success has been due to its large number of long-haul routes, which enable it to maintain a low ratio of operating costs to revenues.

The line's principal routes stretch across the northern part of the country, linking the Pacific Northwest, the Midwest and the East Coast.

IT&T Reports Record Profits, Sales

NEW YORK, Nov. 12 (Special).—International Telephone & Telegraph Corp.'s sales and profits for the third quarter and the first nine months of the year climbed to record levels, Harold S. Geneen, chairman and president, reported today.

Sales in the third quarter were up 15 percent to $1.2 billion from the year-ago quarter and net was reported 16 percent higher at $54.9 million, or 72 cents a share, from the $47.1 million, or 64 cents a share in the 1968 quarter.

For the nine months, sales hit $3.5 billion, 13 percent better than the $3.1 billion of the year-earlier period. Profit was reported at $155.4 million, or $2.07 a share, up 15 percent from the $134.7 million, $1.82 a share, a year ago.

Ashland Oil

Ashland Oil and Refining Co. reported today that it wound up its fiscal year with a 5.6 percent gain in net earnings on a 9 percent gain in revenues.

For the year ended Sept. 30, the firm reported profits of $52.34 million, or $2.30 a share, compared with $49.57 million, $2.21 a share, for fiscal 1968. Revenues rose to $1.17 billion from the year before's $1.07 billion.

On the outlook for the coming year, the firm said in Ashland, Ky., that discussions with the Libyan government have reaffirmed its belief that agreements there will be honored. The company also said that present geological information defines good prospects on Indonesian concessions, covering 60,000 square miles, in which it has a one-third interest.

Genesco Inc.

First-quarter profits and revenue for Genesco Inc. showed little change from year-earlier levels.

Earnings rose 2.6 percent, to $10.19 million, or 84 cents a share, from $9.93 million, 85 cents a share on 400,000 fewer shares outstanding, in the year-ago quarter.

Revenue inched up by 1.5 percent to $308.3 million from the year-earlier $303.7 million.

Becton, Dickinson

Becton, Dickinson and Co. realized a 17 percent increase in earnings for the fiscal year to Sept. 30 on a sales gain of 18 percent, according to yesterday's annual report by Fairleigh S. Dickinson jr., company president.

The maker of medical, hospital supplies, and related products has benefited from the strong trend toward disposable products in the field, he said, and sales and earnings have again reached records.

Net income amounted to $16.26 million, or $1.01 a share, compared with $13.88 million, or 86 cents a share, in the preceding fiscal year. Net sales were $205.1 million, up from $174.35 million.

In the fourth quarter, however, the profit gain had eased to 11.6 percent, with net totaling $5.3 million, 31 cents a share, up from $4.75 million, 29 cents a share, a year ago, while revenue climbed 21 percent to $54.1 million from $44.74 million.

Strike Threatens Existence Of AMC, Says Firm's Chief

By Jerry M. Flint

DETROIT, Nov. 12 (NYT).—The president of American Motors Corp. said yesterday that a continuing strike threatened the company's existence.

The strike, at the company's assembly plants in Kenosha, Wis., began Oct. 16 and AMC's production in the United States has been halted since. The company is the smallest and financially weakest of the four major U.S. automobile manufacturers.

The strikers were voting today on a proposed contract. The top officers of the union here have asked that the pact be ratified, but local officials have recommended that it be turned down.

William Luneburg, AMC president, said:

"The decision will be one of the most important that members of Local 72 have ever made, because after almost four weeks of lost production and lost sales, the future of American Motors in the automobile business is in danger."

The strike concerns working conditions. The company wants to remove a union veto on the scheduling of overtime if seniority workers are on layoff, and says it has made 75 concessions "in a continuing effort to end the strike."

"We are now the only company in the industry subject to a union veto on overtime" and this restriction "is a serious disadvantage to American Motors in reacting to rapid shifts in market demand," Mr. Luneburg said.

AMC employs 17,650 people. Car production resumed in a Canadian plant this week but cannot continue for long unless the strike at Kenosha ends.

The 1970 AMC recovery effort is pegged to the sales of a new small car, the Hornet, but because of the strike, dealers do not have many of the new models left to sell. Traditionally if a car does not get off to a good start at the beginning of the model year, it has trouble getting a successful image.

Sales, Profits At Courtaulds Up in 1st Half

LONDON, Nov. 12 (Reuters).—Courtaulds Ltd., the man-made fibers and textile group, today reported an 11 percent earnings gain in the six months ended Sept. 30 while sales rose by 13 percent.

The firm said current credit restrictions in Britain make it difficult to forecast domestic results for the second half of the financial year. Also, it said, its important North American market has been slowing down. But Courtaulds called the longer-term outlook encouraging.

Net profit jumped to $31.92 million in the six months, compared with $28.3 million in the year-ago period, while revenue rose to $720 million from $638.4 million.

The firm also noted that unofficial work stoppages at some British plants cut profits by about $3.6 million in the first half.

Beecham Group

The Beecham Group, makers of pharmaceuticals, toiletries, and food products, reported that after-tax profits in the first six months of the year rose to $17.28 million from $14.88 million in the year-ago period. After routine deductions, net came to $16.8 million, up from $14.16 million.

The firm said earnings per share came to 12 cents on an increased number of shares resulting from the acquisition of the Horlicks group in February. Last year, per share earnings came to ten cents.

KLM

KLM Royal Dutch Airlines reported from The Hague that net earnings for the quarter ending Sept. 30 slipped to $15.43 million from $15.46 million a year ago, but earnings in the first fiscal half were ahead of year-earlier results by $21.39 million to $20.83 million.

Revenue in the quarter rose to $92.76 million from $70.58 million. In the six months, revenue came to $169.32 million, up from $146.73 million.

Year-End Tax-Selling, Tax-Switching Cited

By Vartanig G. Vartan

NEW YORK, Nov. 12 (NYT).—The New York Stock Exchange, caught in the cross currents of tax-selling and tax-switching, moved slightly lower today.

There were 572 advances and 752 declines and, on the trading floor, members pointed to year-end tax considerations as exerting a major influence on individual issues.

Despite its lower trend, the Big Board did star such performers as McIntyre Porcupine Mines, up 6 3/4 to 132 1/2, and Storer Broadcasting, up 5 to 40.

Meanwhile, Penn Central ran downhill to a new low price for 1969. Shares of the world's largest transportation company slipped 1 3/8 to close at 29 3/4. This compares with a peak of 86 1/2 in mid-1968 on the heels of the railroad's giant-sized merger.

The Dow Jones industrial average, closing at its lowest level of the session, dropped 3.76 at 855.99. Thus, the indicator virtually repeated yesterday's decline.

Volume on the Big Board, with banks back in business after taking a holiday for Veterans Day yesterday, expanded to 12.48 million shares from 10.08 million shares.

Storer Broadcasting had a delayed opening at 45—up 10 from its previous close—following announcement of the merger agreement between Northwest and Northeast, in addition to television and radio station properties.

Northwest, a highly profitable airline in contrast to money-losing Northeast, eased 3/8 to 34 5/8.

McIntyre Porcupine's major interest is its 37.5 percent holding in Falconbridge Nickel and the latter's strength in Canadian stock markets was cited as one reason for McIntyre's new high.

As for Penn Central, brokers noted it was a target for tax-loss selling due both to fear of a possible dividend cut and discouragement over its railroad earnings.

Ten of the 15 most active issues closed lower and five were gainers.

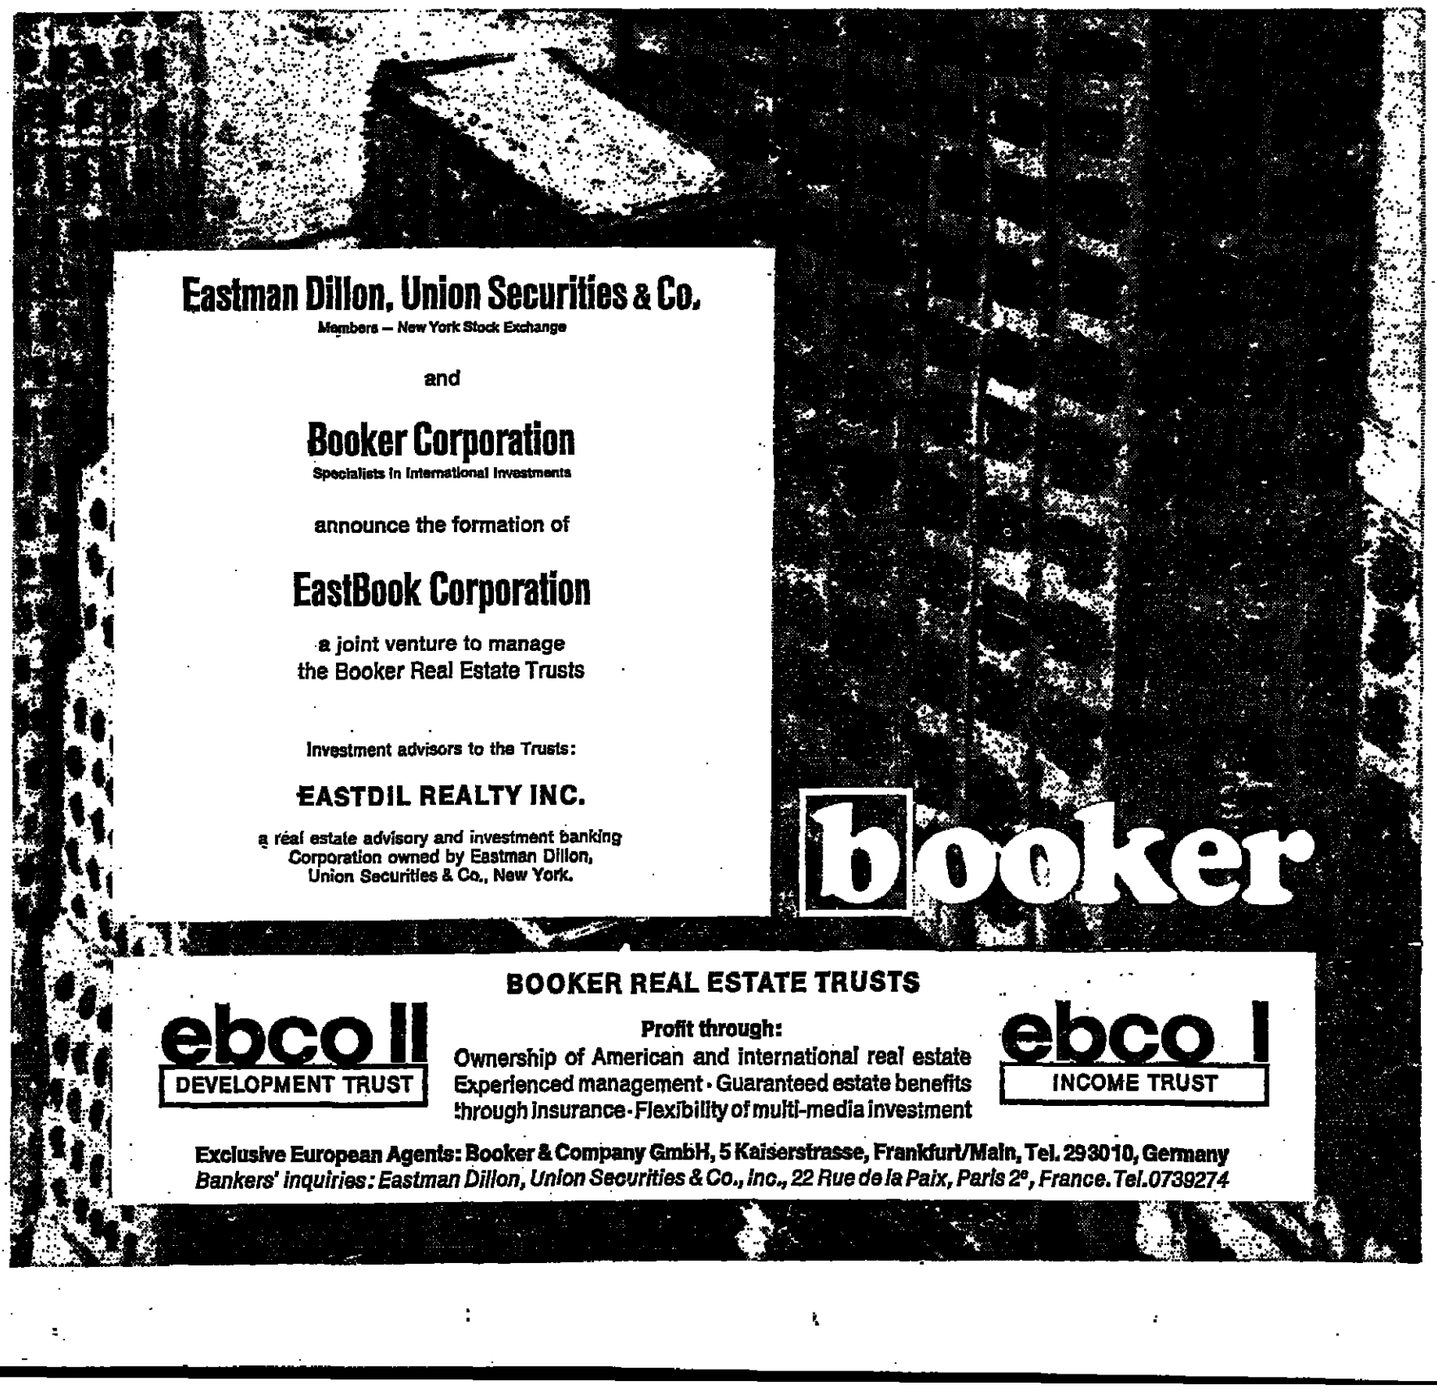

City Investing led the most active list and lost 1 7/8 to 30 3/8 after it was hit by a 411,000 share trade at 29 3/4.

Textron was off 1/8 to 30 1/8. The firm told analysts that 1969 earnings would be slightly higher than last year's.

United Aircraft continued to slip after its report of lower third quarter profits. The issue eased 3/4 to 47 1/4.

Libyan oil stocks perked up after a statement by Ashland Oil that it was reassured contracts with the new government would be honored. Occidental rose 1 1/2 to 26 1/8 and Ashland 1 1/2 to 31 7/8.

Jonathan Logan rose 1 1/2 to 60 on news it had increased its potential holding in the financially troubled Villager Industries under a management contract.

z—Sales in full.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. d—Declared or paid in 1969 plus stock dividend. e—Paid last year. f—Payable in stock during 1969, estimated cash value on ex-dividend or ex-distribution date. g—Declared or paid so far this year. h—Declared or paid after stock dividend or split up. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. p—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. r—Declared or paid in 1968 plus stock dividend. t—Paid in stock during 1968, estimated cash value on ex-dividend or ex-distribution date.

cld—Called. x—Ex dividend. y—Ex dividend and sales in full. x-dis—Ex distribution. xr—Ex rights. xw—Without warrants. ww—With warrants. wd—When distributed. wi—When issued. nd—Next day delivery.

vj—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies. fn—Foreign issue subject to interest equalization tax.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

FOREIGN INSTITUTIONAL SALESMAN

New York Investment Banking Firm seeks American Citizen for Institutional Sales Position in its London Office. Research or Institutional background preferable. Period abroad 3—5 years following approximately one year in New York Office. Write fully in strict confidence, indicating salary requirements.

P.O. Box 226, Church Street Station
New York, N.Y. 10006
Department 38H

NOW YOU CAN HAVE PERSONAL, CONTINUING AND PROFESSIONAL SUPERVISION OF YOUR PORTFOLIO

Whether you are an American abroad or a European at home, you can benefit from Roger E. Spear's Decision Management Plan . . . a plan which employs modern electronic computers, expert research, and the skills of investment specialists at Spear and Staff to analyze facts and help make timely decisions for you . . . wherever you are.

Serving clients in all the U.S., and around the world, the Decision Management Plan has proven most helpful in achieving conservative growth for investors with capital ranging from $10,000 to $100,000 upwards — investors who appreciate the risks and seek the rewards of a professionally managed common stock portfolio.

Our brochure, "Declare Your Own Dividends in U.S. Securities," will tell you more, much more, about Decision Management. It is yours with our compliments . . . send for it today.

SPEAR & STAFF, INC. Dept. MHI-N13
Investment Management Division, Babson Park, Mass. 02157

Please send me details on how to have my own individually managed portfolio of U.S. Securities, and the brochure "Declare Your Own Dividends." No cost or obligation, of course.

z—Sales in full.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. d—Declared or paid in 1969 plus stock dividend. e—Paid last year. f—Payable in stock during 1969, estimated cash value on ex-dividend or ex-distribution date. g—Declared or paid so far this year. h—Declared or paid after stock dividend or split up. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. p—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. r—Declared or paid in 1968 plus stock dividend. t—Paid in stock during 1968, estimated cash value on ex-dividend or ex-distribution date.

cld—Called. x—Ex dividend. y—Ex dividend and sales in full. x-dis—Ex distribution. xr—Ex rights. xw—Without warrants. ww—With warrants. wd—When distributed. wi—When issued. nd—Next day delivery.

vj—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies. fn—Foreign issue subject to interest equalization tax.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

BRIDGE — By Alan Truscott

South opened with one club, a strong forcing opening in his system, which follows that used by two of the Italian world champions.

West jumped to two spades pre-emptively, and North's double showed moderate strength at least 6 points—but denied having as much as an ace and a king in top cards. After the heart fit was uncovered, both players made cue-bids and North made the final decision to bid the slam.

If West had led a spade, giving his partner a ruff, South would have had to guess the location of the heart queen. After the lead of the club king, taken by the ace in dummy, the problem was more complex. South had potential losers in spades, hearts and clubs.

Taking a trump finesse would have put all South's eggs in one basket. Even if the heart queen could be collected successfully, he would need a discard on dummy's diamonds. So South played the ace and king of hearts, hoping that the queen would drop, and it did. He was then able to make all 13 tricks by cashing his diamond winners, leading to the heart jack, and discarding his losers on dummy's diamonds.

If East had held three trumps, headed by the queen, South would have had another string to his bow. He would have hoped that East began with exactly three diamonds. The diamond ace and king would be followed by the jack, overtaken in the dummy. The club loser would be thrown on the fourth diamond, and whether East ruffed at once or not the spade loser would go on the fifth diamond.

THE ESTATE

By Isaac Bashevis Singer. Translated by Singer and Elaine Gottlieb. Farrar, Straus & Giroux. 374 pp. $6.95.

THE ACHIEVEMENT OF ISAAC BASHEVIS SINGER

Edited by Marcia Allentuck. Southern Illinois University Press. 173 pp. $4.95.

Reviewed By Thomas Lask

"THE Estate" completes the history of the Jacoby family begun in "The Manor." Perhaps the better word is terminates. The difference is crucial to Singer's way in these two books. There is no sense of a rounding out or balance or symmetry. His novel runs on like the human species. Death does not stop it nor upheaval. Life is a series of visitations. Some succumb, some survive. It is the events and the quality of life between the terminal points that are Singer's concern. This layering of one generation over another, the treatment that makes a minor character as significant for the moment as a major one is troublesome. There are dozens of characters. The time between their appearances is sometimes so great that the reader has to search his memory to recall when he met them last. The language and images with which he surrounds them blur in the mind before we encounter them again. It is a strange fact that the individual scenes so artfully constructed and so forceful in themselves too often remain as discrete chapters rather than as organic parts of the whole.

Backdrop of History

This judgment may be unfair to the author. For the central character of his work is not an individual but a process: the entire flow of Jewish history in Poland from the rebellion of 1863 to the end of the century. All the passions to which Polish Jewry were subjected in those years are embodied in the people in the novel: the Enlightenment that came out of the West; the proto-Zionism that wanted a return to Palestine as a refuge from persecution and because it was the Promised Land; the modernizing trend that felt that the solution for Polish Jews was assimilation; Marxism, which saw the Jews as only a single strand in worldwide revolutionary upheaval. And of course there were those who held on to the old faith and ancient ways, who knew that these practices and beliefs had preserved the people for centuries and saw the loosening of religious ties as the destruction of the community. The most moving pages in the work come from the bewilderment and sorrow of those who cannot cope with the new forces. When Calman Jacoby's daughter, Miriam, runs away with a gentile, Jacoby cuts her from the family and mourns her as one dead.

His characters are not historical puppets though. They have individual attributes and are driven by the impulses that make Western man. It is this that makes Singer a modern writer, though William H. Gass in the Allentuck volume denies it. As Eli Katz points out in his essay in the same book, Singer uses the same material as others but transcends it. The queries they put to life: of va pose, of the duality of s animal appetite; the fa despair and anxiety th are questions and state ing to which contempo responds. Singer's char only understudies to th holders, but they are the great stage.

His ability to rise a moment and the mill him from being a histo elist. The time of his past. The Jewish comm Warsaw and the dusty Jampol are one with J America. But though t feeling of history past, that of history dead guish of assimilation, t of anti-Semitism, the tion of sanctity, the c the young, the guilt illicit lust and holiness ren state of marriage weight on the heart of ple. And though for th phases are altered, th remains. No one who re Manor" or "The Est confuse these works tume drama.

Jockeys on Two U.S. Horses

They Weren't Looking at Karabas

By Shirley Povich

LAUREL, Md., Nov. 12 (WP).—Most of the time around in the International it was the Americans in front, the hosts, Don Florestan from Canada and Sabinus II from Italy. This was not being regarded as significant. They still had to go over the grass and were fairly certain that the Britishers would finish on the tail of the bus.

Any concern of Czar Alexander, the second choice, was the other way around in the seven-horse field. The 7-5 favorite, Hawaii, Angel Cordero Jr., who had the mount on Czar, hustled him into a promising spot in third place, his attention watching for Hawaii from the corner of his eye.

Jorge Velasquez, on Hawaii, made his bid to improve his position when they were running down the backstretch. When Warren Wright around the clubhouse turn, Cordero clucked to Czar Alexander and tucked him nicely onto the rail, leaving the favorite to get the best of it on the outside. Meanwhile, the Britisher, Karabas, was staying close to the leader farther on the outside, a length behind the Czar, who would take the lead when the front runners quit.

It was a bright race Cordero was riding, saving all that ground, while keeping Hawaii on the outside. As for Karabas he was the race's unknown quantity, all the reckoning. Karabas was the horse to beat, Hawaii presumably, by Cordero's orders.

Jorge Velasquez, on the Czar, reported with peripheral vision should have noted that Lester Piggott on Karabas, was in no hurry. Piggott was riding at stepping height, which meant he was not sailing for much from his mount, yet still was in close striking position. If Cordero was unaware of this, a small company of Britishers among the 28,936 fetched to Laurel by the International were not. They were the group, a now-jolly band of 172 Englishmen who had gotten up $450 each for the all-expenses trip, undaunted by the fact that no British horse had won the race since the first running 17 years ago.

The 172 Britishers could understand that this was not merely Piggott giving it the long-stirrup riding style indigenous to English jockeys. They could tell that he had, in Karabas, a splendid mount that was crying to run and was able to stay close to the lead while being asked for very little. They would readily belive what Piggott said after the race: "I always knew I would win it."

A quarter-mile from the finish, the two rabbits in front in the early running had chucked it, and Czar Alexander was in front by default, a half-length to the fore of Hawaii with Karabas in close attendance. This, then, was it, the first three choices about to battle it out in the last two furlongs.

At this point, Karabas was becoming more of a quantity. Originally he was not deemed worthy of an invitation. It went to Park Top, the superb mare that had won horse-of-the-year accolades in Britain. But Park Top got off her feed, or came down with female trouble or something, and had to politely decline. On the theory it would be nice to have a British horse in the race, an invitation went out to the stable's No. 2 pride, Karabas.

British turf writers were faint-hearted about Karabas in the International, pointing out that if he wasn't the best horse in the race he was at least the handsomest, and that was not very debatable. He is the son of Worden II, the Frenchman who had won this race in 1953, a beautiful bay that had been showing strutting tendencies all week in the International Village stable area.

For all of his beauty, it was also remarked that no peacock had ever won the International. And in the saddling area before the race he was the complete rogue. He tried to kick everybody within reach of his hind legs, and appeared on the verge of a tantrum.

But he was full of run and with a single purpose when they turned for home. Czar Alexander on top by a half-length, Hawaii second, and Karabas barely a length and a half off the lead, with Piggott still riding high. At this point, Cordero, on the Czar, tried one more time to take care of Hawaii, drifting out a bit and forcing Velasquez on the favorite to go even wider.

Cordero was playing into the hands of Piggott and Karabas, because he left an opening on the rail, and now Piggott asked his colt for a good lick and got it. Karabas, hugging the rail, shot to the front, and the race was over.

And Piggott was making certain that it was, because for the first time he went to bat, laying a demanding whip on the flanks of Karabas, who didn't mind at all, improving his lead by inches with each willing stride.

Carries Grudge for Year

Piggott Tells U.S. Press: 'The Hell With You Guys'

By Fred Feldkamp

LAUREL, Md., Nov. 12.—"The hell with you guys," said Lester Piggott, a few minutes after he dismounted following his winning ride aboard England's Karabas, in the Washington D.C. International yesterday. He was referring to the American press representatives who greeted him as he strode into the jockey room, still burning—12 months later.

"After what you said about me last year, I'm not going to say anything," he added. Some U.S. papers criticized his ride on Sir Ivor in last year's edition, although he won the race.

Then, spotting a familiar face from Paris, he said to this reporter: "Hi. I'll talk to you later."

After showering, Pigott did open up to the general press to confirm that he was leaving for Japan in a few days to ride there, and that he thought Sir Ivor was superior to Karabas. But nothing about the race.

At Laurel president John Schapiro's Turf Club "toast to the winner," party, Piggott confided, in a confidential whisper, when asked when he knew he had the race won, "At the bloody beginning." That's a big speech for Britain's No. 1 rider.

Then, as British jockey Jimmy Lindley, who finished fourth on Germany's entry, Hitchcock, joined the party, it developed that Piggott really knew he had it sown up about a quarter-mile from home when he moved through an opening and overtook Hawaii and Czar Alexander, who finished second and third respectively. No one could possibly say anything but "bravo" after Piggott's riding performance yesterday.

Keystone.

Lester Piggott
Tight-mouthed.

Chart of the International

Washington, D.C., International, $150,000, 1 1/2 miles, turf, 3-year-olds and up, weight for age, by invitation only. Value to winner $100,000, second $26,000, third $15,000, fourth $5,000, fifth $5,000, sixth $5,000. Handle 423,326.

Horse	P.P.	Trainer	1/4	1/2	Mile	1 1/4	Str.	Fin	Jockey	To $1
Karabas	4	Van Cutsem	5-1½	5-½	3-1½	1-1	1-1½	1-1½	Piggott	3.60
Hawaii	5	Miller	4-1	4-½	4-½	2-1	2-1	2-½	Velasquez	1.20
Czar Alexander	2	Penna	3-½	3-1	2-1	1-½	4-½	3-12	Cordero	1.90
Hitchcock	3	Jentzsch	6-½	6-2	6-6	6-12	5-½	4-1	Lindley	32.50
Sabinus	6	Luro	2-3½	3-½	2-½	5-½	6-20	5-3	Amestoll	25.90
Don Florestan	7	Calanese	1-3	1-1	1-h	4-3	4-2	6-18	Moreira	29.20
Takeshiba-O	1	Okubo	7	7	7	7	7	7	Furuyama	16.70

Times: 0:25 4/5; 0:50; 1:14; 1:38 1/5; 2:27. Weather cloudy, track firm.
4—Karabas, 3.20, 3.60, 2.80; 5—Hawaii, 2.80, 2.20; 2—Czar Alexander, 2.60.
Winner, b, c, 4, by Worden-Fair Share, by Tantieme. Trained by B. Van Cutsem, bred by estate of W. J. Mitchell (Ireland). In gate 3:43, off 3:43 1/2 (EST). Start good, won driving.

KARABAS, taken under stout restraint along the inside rail soon after the start, maintained his position to save ground, remaining under stout restraint with the jockey high in the saddle until reaching the final quarter-mile, moved through inside CZAR ALEXANDER entering the stretch, had a clear lead a furlong out and remained clear under righthanded whipping. HAWAII, away in good order, remained outside losing ground on all three turns, moved after the leaders approaching the mile, engaged for the lead outside CZAR ALEXANDER midway on the final turn drifted out slightly while straightening for the final drive, then responded to strong urging but could not reach KARABAS.

CZAR ALEXANDER, was tucked in along the rail behind the early leaders under good restraint for a mile, moved inside DON FLORESTAN leaving the backstretch the second time, gained a short lead on the final turn, could not keep pace with KARABAS and was unable to outfinish HAWAII.

HITCHCOCK, in close between rivals throughout the first mile but in no trouble, gave a response when set down for the final straightaway and outfinished SABINUS II. SABINUS II attended the pace set by DON FLORESTAN while remaining out of the inner rail, lodged a bid for the lead after six furlongs that was unsuccessful and gradually dropped back thereafter.

DON FLORESTAN, opened a clear lead soon after the start, set the pace under light restraint for six furlongs, remained with the pace to the stretch turn and tired thereafter. TAKESHIBA-O trailed throughout in a dull effort.

Owners—1, Lord Iveagh; 2, Cragwood Stable; 3, G. Ring; 4, K. Muenchow; 5, Capua; 6, Col. M.A. Degregorio; 7, M. Obata.

N.D. State in Bowl

KANSAS CITY, Nov. 12 (UPI).—North Dakota State, rated No. 1 among small college teams, has been named by the National Collegiate Athletic Association to play in the Camellia Bowl Dec. 13

Wool Bowl Is Set

ROSWELL, N.M., Nov. 12 (AP).—Rochester, Minn., Junior College will meet Iowa Central Community College of Fort Dodge in the Wool Bowl on Dec. 6 here.

Cox, Stilwell To Join Pros In February

LONDON, Nov. 12 (Reuters).—Mark Cox and Graham Stilwell, who took Britain to the Interzone final of the Davis Cup tennis competition this year, have signed professional contracts.

It was announced today that they will join the American-based World Championship Tennis group on Feb. 1.

John Barrett, Britain's former Davis Cup captain, who has completed all the negotiations for the two players, said today:

"Mark has signed a contract for $75,000 over three years, and Graham's contract is for $90,000 over four years."

Barrett said that the British Lawn Tennis Association had been kept informed throughout the negotiations.

But Owen Davidson, Britain's Australian-born Davis Cup coach, said, "It is a big shame. We did so well this year, and I think we would have done equally as well, if not better, next year."

Cox and Stilwell helped Britain beat Switzerland last night in the King's Cup European indoor tennis competition.

Hopman Quits Aussies

MELBOURNE, Nov. 12 (Reuters).—Harry Hopman, 63, has ended 41 years with Australian Davis Cup teams to accept a nine-week coaching contract in the United States.

Hopman will coach with All American Sports Incorporated in Connecticut, starting in mid-June.

"I have no regrets about leaving the cup team as captain," he said. "I've had a wonderful time."

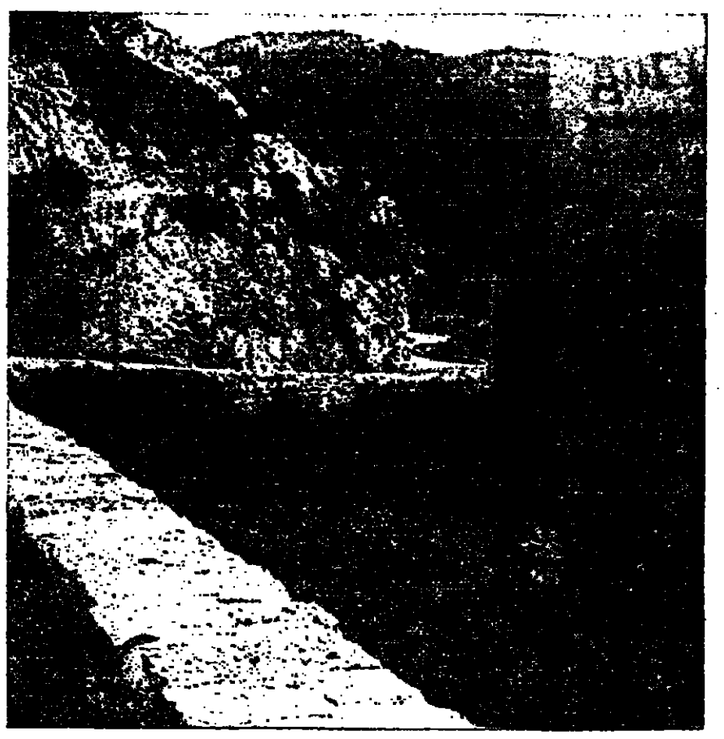

Asked whether he would coach tennis when he returns to Australia, he said: "I doubt that very much."

Springboks Lose; So Do Protesters

NEWPORT, Wales, Nov. 12 (AP).—Newport handed the South African rugby union Springboks the second defeat of their British tour today—a match that saw another anti-apartheid demonstration.

About 500 protesters clashed with police shortly before the start of the game. The police dispersed the demonstrators with little trouble.

Newport, which defeated New Zealand two years ago, beat the Springboks, 11-6, before a crowd or 22,000. Earlier Oxford University defeated the Springboks.

Part of the stretch from Bocognano to Bastelica, shown here, was used as speed test for Tour of Corsica auto rally. This section of the course was run at night. It is not considered one of the most dangerous of the rally.

IHT Photo by Mike Katz.

On the Road In Corsica

By Mike Katz

AJACCIO, Corsica.—The officials forgot to show up at the first checkpoint, the fourth-place finisher hit a donkey during the night, but 27 of the 71 starters in the 14th Tour of Corsica made it back here Sunday, causing one local paper to comment, "That must be some kind of record."

The Tour of Corsica is for automobiles and masochists. Unlike most rallies, it does not take days or weeks to complete, but runs less than 24 hours. There are not many roads in Corsica.

What there are has caused the race to be modestly subtitled the "Rally of the Ten Thousand Curves." There are more than 20,000 on the 1,038-kilometer (about 670 miles) course, and that's not including slight bends in the road. Most of the Corsican roads are narrow, poorly paved frayed ribbons that cling for dear life to the sides of mountains with few guardrails to protect cars from 3,000-foot drops.

It amazes the Corsicans year after year when rally cars leave the road and the drivers miraculously escape death or injury.

"See that spot there," said one local, pointing up to a lamppost on the side of a hill far off in the night. "Last year, a car went off the road and rolled over, but it got caught in some cable and was just suspended there in midair over the valley below. The driver and the navigator didn't even get scratched."

Most of the rally takes place in the mountains. For the average motorist, the biggest danger there is the unknown car coming around the next curve in the opposite direction.

"Most of our accidents here, and we don't have that many," said a Corsican official, "are from head-on collisions. But because no one drives very fast, even these are not usually that dangerous."

For the Tour, of course, the roads are closed, supposedly eliminating that problem. But at the first checkpoint, the controllers showed up late and nonrally cars going in the opposite direction caused officials to discount the first section entirely. Amazingly, there were no accidents.

Because of the condition of the roads, those parts of the rally that are not speed tests (60 percent of the rally) have a fixed speed of 60 kilometers an hour (36 m.p.h.). A driver has to make it from one checkpoint to the next averaging that speed: if he gets there too early or too late he will be penalized. But even in the ten speed tests, the average speed is less than 80 k.p.h. (48 m.p.h.).

The rally reflected the driving hazards in Corsica. Jean-Pierre Nicolas brushed into a donkey with his Renault-Alpine and bent his rear bumper and lost a tail-light. The donkey apparently was not seriously injured. Nicolas, who could as easily have hit a jaywalking sheep, goat, pig, dog or cow, went on to finish fourth.

First was Gérard Larrousse, an able French driver who was second at the 24 Hours of Le Mans and Monte Carlo Rally this year. He and his navigator, Maurice Gelin, won in the same Porsche-911 R in which they recently captured the Tour Auto de France.

Gelin was also the winning navigator last year, with Jean-Claude Andruet in an Alpine. Andruet was well ahead at the midway point this year, winning the first five speed tests, but then left the road, cracking the rear of his car, and had to retire.

Second was Pierre Orsini, a native of Ajaccio, who has won this event three times and is a local legend because of his knowledge of the roads. Orsini and his regular navigator, Jean Canonicci, were also in an Alpine. Third was Jean-François Piot and Jean Todt in a 2.5-liter Ford Capri, an unusually big car for these roads.

Pro Football Roundup

Chief-Raider Race Is the Only One Remaining

By William N. Wallace

NEW YORK, Nov. 12 (NYT).—The Oakland-Kansas City contention in the Western half of the American League is the only bona fide race remaining in pro football's six divisions. The National League's four division winners have been largely determined—Rams, Vikings, Cowboys, Browns—while the Jets are home free in the AFL's Eastern Division. St. Louis, two games back, could give Cleveland a scare before the season ends on Dec. 21. But the Cleveland schedule is soft, like a cream puff.

The first of the Cowboys' two games against second-place Washington (two games back) comes up Sunday and Dallas clearly is superior even without its best offensive lineman, Ralph Neely, who will miss a game or two. Neely's knee was injured in last Sunday's New Orleans game.

"I thought it was going to drop off," he said. "I was lucky. I was hit from the front. If it had been from the side..."

The sport's weekly knee carnage continued. Baltimore has lost Tom Mitchell for the season because of knee surgery. This valuable reserve tight end, picked up from Oakland, had in two seasons caught just 16 passes but seven were for touchdowns. Jimmy Orr has a chronic leg muscle pull, so the Colts are short on receivers.

So is Denver. Gone for the season after knee surgery is Mike Haffner, the team's No. 2 pass catcher. The same fate befell Billy Van Huesen, the Bronco punter.

* * *

Mild Bart Starr was furious. Starr started at quarterback for Green Bay against the Colts but was replaced after one series by Don Horn and the Packers lost without scoring a touchdown. "It's hell standing on the sidelines," said Starr. "Coach (Phil) Bengston wanted me to start and I did. Then he took me out. If you want to find out more, ask him."

Bengston said that Starr's arm, which has been weak and sore, "still had too much pain." The coach commended Horn, Starr's intended successor after Bart's impending retirement.

Marty Domres, the Columbia quarterback, started his first game for San Diego in place of sore-armed John Hadl. The Kansas City defense intercepted five of his passes and dropped him four times for losses as the Chargers failed to score a touchdown for the third game in a row. The Chiefs have allowed only 88 points in nine games, a record average of 9.8.

* * *

Houston, threatened from below by Miami for second place and playoff qualification in the AFL East, switched quarterbacks. Don Trull, dismissed by the same coach (Wally Lemm) in 1967, replaced Pete Beathard. He completed 16 of 32 attempts but was outdone by Cincinnati's Greg Cook—15 of 25 and four touchdowns—in a 31-31 tie. Said the Bengals' proud coach, Paul Brown: "If we get a couple of linemen in the draft, we'll play with anybody."

Buffalo is not using the celebrated O.J. Simpson. The Bills were inside the Jet 20 five times and never scored. Simpson carried the ball just once inside the 20 and made, a touchdown nullified by a penalty.

* * *

With Greg Landry at quarterback in place of the injured Bill Munson, Detroit has quietly won three of its last four games. . . . The 49ers' new field-goal-kicker is Momacilo Gavric, a soccer player who replaced Tommy Davis, a team member since 1959.

Daryle Lamonica has thrown 25 touchdown passes this season for Oakland. The league record is 36, set by George Blanda of Houston in 1961. Lamonica had three against Denver and three times the Broncos were penalized for roughing Daryle.

* * *

Joe Kapp completed 12 of his first 13 passes against the Browns and the Cleveland coach, Blanton Collier, said: "He has to be the most underrated quarterback in football. He's got it all, mental and physical toughness, quick throwing and leadership." Said Gary Collins, the Cleveland flanker, of the Minnesota pass rush: "My mother could cover me with that big rush of theirs."

Calvin Hill, a divinity student, apologized all over the place for losing his temper against New Orleans. He threw a football in the face of Elijah Nevett, the Saints' cornerback; punched another Saint for verbal comments, and kicked while on the ground after a tackle. "I lost my poise. I'm sorry. A player shouldn't do that."

Commented Jack Faulkner, a New Orleans coach: "Hill, a rookie, shouldn't be acting like an immature young man. He's playing with a championship team and should act like a true Christian."

* * *

It had rained for eight days in Boston, depositing 4.5 inches, before the muddy Patriot-Dolphin game. But Bill Sullivan, the Boston president, never considered a postponement. He lauded the 8,347 fans who showed up. The club had sold 19,871 tickets.

Knicks' 10th Straight Avenges Lone Setback to Warriors

NEW YORK, Nov. 12 (AP).—The New York Knickerbockers can relax again. They don't play San Francisco again until Jan. 7.

The Warriors are the only National Basketball Association team to solve the Knicks this season. That came back on Oct. 23. New York has won ten straight since then, the latest a 116-103 revenge victory against the Warriors last night.

The Knicks trailed by 10 points after the first period and by 5 at halftime. But they took control in the third period and won going away.

The victory gave New York a 15-1 record, one short of the best NBA start. St. Louis was 16-1 in 1967.

Bucks 129, Celtics 118

Flynn Robinson and Jon McGlocklin shredded Boston's defenses and Lew Alcindor dominated the boards and poured in 28 points as Milwaukee handed the Celtics their fourth straight loss, 129-118. Robinson had 31 points and McGlocklin 26.

Hawks 124, 76ers 107

Atlanta, enjoying almost as hot a streak as the Knicks, routed Philadelphia, 124-107, for its eighth straight victory.

Pistons 110, Lakers 102

Eddie Miles, Terry Dischinger and Jimmy Walker paced Detroit past Los Angeles, 110-102. Miles had 24 points—16 in the first half when the Pistons jumped off in front. Jerry West led the Lakers, who now have lost four in a row at home, with 24, despite taking ten stitches when he suffered a cut over his left eye. It was Piston coach Bill Van Breda Kolff's first victory over his old club.

Bulls 106, Sonics 100

Tom Boerwinkle scored 12 points and pulled down 13 rebounds in the final quarter, helping Chicago beat Seattle, 106-100.

Art Buchwald

Anniversary of a Flag

WASHINGTON.—This is the anniversary of the making of the first Viet Cong flag in the United States. Although many people know the story, I still feel it is worth repeating.

Buchwald

A group of anarchist, militant, revolutionary, Maoist, Trotskyite, pro-Castro moderates were planning to demonstrate against the war in Vietnam, and they knew they would need a flag. One of them said: "Hey, I know a chick in Philadelphia who has an upholstery shop, and she could do it for us. Her name is Betsy Wrath."

So a delegation made up of three founding fathers bought half-fare student tickets and flew to Philadelphia to see Betsy.

They found Betsy hard at work embroidering an obscenity on a cushion, which had been ordered by a student for the takeover of a dormitory at MIT.

"Betsy," the head of the delegation said, "we have come to ask you to make us a Viet Cong flag that we can carry in a Fourth of July parade in Chicago. You are the only one who can make it for us."

* * *

Betsy beamed. "This is a great honor you have bestowed on me, but I haven't the slightest idea what a Viet Cong flag looks like."

"We haven't either," one of the delegation said. "Betsy, you will have to start from scratch."

"Well," said Betsy, "I guess I'd better look and see what material I have available." She opened a drawer and took out some blue linen. "How does this hit you?"

"It shouldn't be all one color, Betsy, or the pigs won't know it's a Viet Cong flag."

She opened another drawer. "Here's some red material left over from a Mao Tse-tung Birthday Ball."

"That's great, Betsy. Sew the two together."

Betsy put the material on her lap and began sewing. One of the students, an art major, set up an easel and started painting Betsy's picture so the historical moment would be recorded for future generations. The other students each took out a stick of marijuana to pass the time, and pretty soon the little shop was filled with smoke.

* * *

Betsy, who was also smoking, had trouble keeping the stitches straight, and it took her seven hours to sew the blue material to the red material. Finally it was finished, and she held it up.

"Betsy, that's a beautiful flag, but it lacks something," one of the delegation said. "There is nothing in it to provoke the fuzz to beating our heads in."

The other students concurred. Betsy opened another drawer and found a piece of yellow material left over from a tablecloth she had made for a coffee house near Fort Dix.

"Why don't I cut out a yellow star and sew it in the middle?"

"That is a tremendous idea, Betsy. The yellow could represent the sun rising over Saigon after the fascist puppets are driven into the sea."

Betsy took another drag on her cigarette, and in five hours she managed to sew the star onto the flag.

The delegation took the flag and tied it to a broom stick, and as they marched out of Betsy's shop chanting "Ho, Ho, Ho Chi Minh," a squad of riot police with clubs swinging broke into the group and arrested everyone.

Betsy, who was watching from her shop window, was thrilled. The flag had been officially accepted.

Now every time someone sees a Viet Cong flag in the United States, they think of Betsy Wrath who, with her needle and thread and dancing, nimble fingers, made the whole thing possible.

Former Rothschild mansion on the Rue du Faubourg-Saint-Honoré.

The New York Times

An American White Elephant in Paris

By John L. Hess

PARIS, Nov. 12 (NYT).—One of the grandest properties the United States owns abroad seems to have become something of a costly mystery. A substantial appropriation has vanished in it, and no one apparently knows how much more will be needed to make it usable.

The building is the former Rothschild mansion on the Rue du Faubourg St.-Honoré, adjoining the British Embassy and less than 100 yards from the Elysée Palace. Its gardens, like theirs, sweep to the Champs-Elysées.

The building was bought from the French branch of the Rothschild family in 1948 for almost $2 million and was used to house the United States Information Service and other agencies. But successive American ambassadors have cast covetous eyes on it because, as a residence, it would enhance the prestige of the United States and cut their commuting down to a stroll across the gardens to the embassy proper.

They also complained that the existing residence, near the Trocadéro, was cramped and subject to traffic noise.

Representative John J. Rooney, the Brooklyn Democrat who holds the State Department pursestrings in the House Appropriations Committee, had long turned a deaf ear to their plaints. Suddenly, in mid-1967, he cleared an $875,000 appropriation to renovate the mansion as an embassy residence.

According to a Washington dispatch at the time, it was expected that the project would take several months.

Curiously, evacuation of the building had been under way for some time before that, the tenant agencies being assigned to a new embassy annex and other less grand quarters.

The Rothschild building was vacant by mid-1967 and, it now appears, may be vacant for years to come. It appears also that it has swallowed, or is about to swallow, the last of the $875,000 appropriation and that it would take perhaps twice as much more to permit an American ambassador to move in with propriety.

Although the mansion is a subject of considerable gossip at the embassy, efforts to obtain authoritative information have run into unusual obstacles. The office of Ambassador Sargent Shriver pleaded ignorance and referred a questioner to the local Foreign Buildings Office, which, although technically part of the embassy, is responsible directly to an office of the same name in Washington that, in turn, is said to be responsible to Rep. Rooney.

The office here first referred a reporter to Washington, then advised him through the embassy that the Rothschild project had been suspended. Efforts to reach its director, Leo Riordan, have been unavailing.

Workers at the mansion said, however, that two major contracts—for a new roof and cleaning and for repair of the outer stonework—had been completed. They were just beginning the third big job, a new plumbing and heating system.

The best available information was that those jobs had taken the bulk of appropriated funds. But when they are finished the building will still be a devastated shell, needing major work inside.

No overall cost estimate could be obtained. At the start, in fact, there was talk of demolishing the building and replacing it with "something modern." This would have offered far more usable space than the present structure, with its 22-foot-high ceilings, but it was vetoed because a modern facade would clash with its elaborately ornamented baroque neighbors.

The site, covering two and a half acres in the heart of the city, is one of the most valuable in Paris.

To restore the Rothschild building to its former grandeur—as West Germany did for its residence here—would be an expensive affair. One reason is that when the building changed hands in 1948 the sellers removed not only the Louis XIV furnishings but also most of the carved woodwork, which adorned walls, ceilings, doors and windows.

Some of the woodwork was recently repurchased by the embassy, but it was found that to reinstall it and supply missing or damaged parts would cost what an informant described as a horrifying sum.

There is no longer any firm plan about restoring the woodwork, nor about restoring the parquet floors removed for the new plumbing, nor about the residence itself. According to the embassy, there is no longer an architect on the job either.

Associated Pr

Gina Lollobrigida and George Kaufman in Rom

PEOPLE:

Gina Lollobrigida To Wed American

Though her first marriage in 1949 broke up and though she said last January that "I don't believe in marrying till you are 80," sultry, 41-year-old Italian film actress Gina Lollobrigida announced happily in Rome yesterday that she is in love and will wed a New York businessman "as soon as possible." At an airport news conference before leaving for the U.S., Gina said, "We wanted to keep it a secret," but word of her romance with real estate millionaire George Kaufman had already leaked out. Kaufman, tall, dark-haired and looking younger than his 40 years, said, "We don't know where and when the wedding will be." However, his parents announced in New York that the wedding would be there Dec. 20, which some wag noted is the longest night of the year.

Both Gina (who wore high boots and a mink) and Kaufman have been married previously. Their announcement heralded a possible legal mess of gargantuan proportions for the actress. Kaufman was divorced four years ago and has two daughters. The actress was granted a separation from Dr. Milko Skofic in 1966, after 17 years of marriage, most of them apart. They had one son. Though Gina said at the airport that her attorneys had instructed her "not to worry," both Italian civil law and the Catholic Church consider her still married. The new we will, in theory, automat excommunicate her and her open to bigamy charg Italy. She said, though, isn't "very interested" in opinion of the church, an ported happily that a guests at her wedding wi of all people, the three A 11 astronauts.
